

Red Light, Green Light....

By Anna Von Reitz

This is the simplest explanation to date:

They reorganized the "government" as a private, for-profit corporation in the business of governmental services.

Without explaining anything to the people, of course.

They then claim, falsely, that we are all knowingly and willingly standing as "surety" for their debts. They do this by undisclosed contract. They get our Mothers to sign paperwork at the hospitals "donating" us to the State of Wisconsin or whichever corporate government franchise is running the operation in the actual State where we are born.

This allows them access to our assets and credit. They then run up huge debts against our assets and credit. Then they go bankrupt and leave us holding the bag as their "secondary" ---- just like if you co-sign for a car loan. They set us up as their co-signer.

And when they pull the plug, we get the bill, and if we can't pay we have to either go bankrupt to protect what we can---- and be part of the problem in the process, or, we lose our assets to pay for their debts.

It's an identity theft scheme applied to our whole country and everyone in it.
