

Situation Report June 3, 2018

By Anna Von Reitz

A French banking cartel, BNP Paribas, sought to rule the world. This was primarily engineered by George Herbert Walker Bush. The instrumentality to secure a world-wide lock-down on all commercial transactions was "Homeland Security" under the watchful eye of Dick Cheney. Just as it says in the Bible, nobody was allowed to buy or sell apart from the Mark of the Beast. [This all concerned banking at the wholesale level, so most people remained blissfully unaware.]

And then, the rest of the world rebelled and formed an answering system -- the Asian International Investment Bank and BRICS and CHIPS.

So now, in answer to worldwide dissatisfaction with having their commerce controlled and eaves-dropped upon, the same basic perpetrators--- claiming now to be "White Hats" and inheritors of the "Homeland Security" functions, make the following demands:

1. We, the States and the People, have to leave the jurisdiction of International Trade and "voluntarily" (have we heard that word before?) enter the realm of international commerce;
2. We have to do this by establishing a commercial Transnational Corporation in "the UK" --- Britain, again, always, Britain at the bottom of every dog pile ---- and by so doing, subject ourselves to THEM, allow them to dictate what we can or cannot do, and have their snoops up our butts in all respects forevermore. We also have to deposit \$30 million in fiat credit to pay for their "services" --when they are already in our employment;
3. We are being coerced to do this in order to receive back the control of and access to vast actual, factual gold, silver, platinum and other assets which belong to us fair and square and which are on "Special Deposit" at their banks and which are in fact underwriting their "central bank system";
4. They have grossly over-stepped any merely presumed office related to securing these assets for us. They have in fact pretended to be our "guardians" while functioning as our employees;
5. This sets up a scenario similar to the children's fable of "The Spider and the Fly"---- they invite us in and offer hospitality in hopes of having a dinner for themselves, but as I informed the vermin this morning, those are our assets, not theirs, and if they wish to appear to be thieves and criminals subject to international arrest and prosecution, all they have to do is continue their bad behavior;
6. We are acting in our proper jurisdiction and if we enter any commercial jurisdiction at all, it will be as clearly identified American Vessels owed all protections and guarantees of the original equity agreement between our government and the British government---- not as specious transnational corporations subject to regulation and seizure;
7. As it stands, the British Government has acted in Gross Breach of Trust and deserves no further credibility in any of the claims that it has made or is making against the American Government, the American States, and the American People---or "for" us, either;

8. As it stands, the Municipal Authorities have abdicated their responsibility and thereby promoted this situation in which banks have been allowed to seize upon private assets and retain control of those assets in contravention of both public and private law long after the owners have been properly identified and have asked for an accounting of the assets;

9. If this situation is not rectified immediately, it will be cause for all parties concerned to "go public" and expose exactly how these banks have stolen from their depositors and used various means of deception and false claims to excuse their self-interested and criminal actions.

There won't be a bank left standing in the western world once people understand exactly how these false governments and the banks have acted as parasites and sought to strangle and control and deprive us all.

And that denouement will not be long in coming worldwide if access to our actual assets and credit owed is not made available tout de suite, together with an end to all claims of debt and bankruptcy connected to these venal and insupportable claims.

I am a member of the generation that remember The Who --- and the lyrics of a certain song: "Meet the new boss.... same as the old boss..... pray we don't get fooled again....."

This is precisely what the French and British governments are colluding to do --- fool us and the rest of the world into thinking something has changed, when it has not. A new computer system has been authorized to carry out the same old rot.

It changes nothing that needs to be changed.

We are not commercial entities. We have no cause to enter the realm of commerce, especially in view of Britain's failure to protect American shipping and its long-established practice of preying upon American shipping in Gross Breach of Trust and commercial agreement.

No, we are the actual owners and beneficiaries and trustees of the assets which these commercial entities owe us, free and clear and upon demand.

It would be a terrible mistake for anyone to form any sort of British Corporation or Transnational Corporation under British auspices, as the British Government is a criminal entity which must inevitably be brought either to repentance or justice. Naturally, those doing business under corporations they charter will be subject to the same penalties and losses as the parent organization.

Equally, it would be a mistake to incorporate under French auspices, for the same reasons. BNP Paribas is as guilty as the Bank of England ever was.

We, the American States and People, are owed vast amounts of money and credit, both. We also represent a coalition of eighteen Historic Trusts that have been stolen and commandeered by these white collar criminals with the approval and participation of the "governmental services corporations". Together, we represent a vast portion of the world's wealth and the world's gold, silver, and platinum reserves.

Possession by pirates does not change ownership. And promises must be kept.

When the assets were deposited as Special Deposits (that is, Holy Deposits), they were deposited in trust and safe-keeping with the understanding that we, the living people, would have control and access to our assets at all times. Nothing has changed that would validate any restriction or change to our original agreements concerning these assets. Our assets are ours and so is any credit owed to us by the banks for their use of our assets to underwrite their client base transactions.

It has never been our desire nor our intention to use our assets for any destructive aim, nor has it been our desire to destabilize any economy or bank, but we wish it to be known and accepted that

our assets are ours and that we have every right to control our own assets without any obligation to function in commerce and without any specious claim that we are or ever were bankrupt, and without any further claim by our employees that they have any duty or right to sit in judgement of our use of our own assets or any business requiring us to form a British Transnational Corporation to receive (1) an accounting of our assets on deposit and (2) to the nominal extent we may require, return of our capital investments and Special Deposits left in safekeeping with any bank in the Central Banking system.

Let this be sufficient Notice and Decree. We wish our assets to be audited and control of our assets to be returned to us free and clear of debt or encumbrance; the cost of the audit, not to exceed the common costs and parameters of audits generally, may be deducted from the asset base.

We wish it to be known and accepted that we are not wards of any state, not bankrupts, not paupers acquiescing to any commonwealth estate, not voluntarily yielding any Powers of Attorney and not allowing any Powers of Appointment--- we are in full life and standing with respect to all our assets in all realms and jurisdictions.

We also wish it to be known and accepted that The United States of America [Unincorporated] is still in existence and operation and has been in such continuous operation and existence since September 9, 1776, and it is owed all of its assets in international jurisdiction returned without debt or encumbrance of any kind--- which includes the assets and the interest and dividends and annuities owed to our States and People and the return of all copyrights, titles, patents, insurances, and other intellectual property established under our (much abused) delegated powers.

We wish it to be known and accepted that such duty and return is due now and there is no excuse nor provision for any excuse otherwise.
