

Again, So Everyone "Gets" It

Again-- the power structure in this country is supposed to run like this:

People > Republics > Counties > States > The United States > The United States of America / Federal United States dba "United States" > Territorial United States dba "United States of America" > Municipal United States dba Municipality of Washington, DC

You will notice that in your lifetime there is only fleeting mention of the Republics and that the Federal United States has been confused both with The United States and with incorporated businesses doing business as the "UNITED STATES" and the Territorial United States has been confused both with The United States of America and with incorporated businesses doing business as the "United States of America".

All this confusion about who is who and what is what is being used to promote fraud of all kinds against the people and actual States. Certain parties have gotten very rich from orchestrating this confusion and all these "similar names deceits" ---- and they don't want to give it up. They have also exercised coercive and war-making powers that they have no right to exercise. They don't want to give that up, either.

The fact remains that they are criminals for promoting, aiding, abetting, assisting, or profiting from this circumstance, and anyone who knows what is going on who doesn't take immediate action to stop it, is either an active or passive accomplice to international crime of a most heinous nature.
