Solutions? You Guys Want SOLUTIONS?

Well, how about this?

The court system is messed up because it has been turned into a giant debt collection agency run by the creditors of the Federal Government and its "State of State" franchises.

The rest of the story is that they are collecting on fraudulent debts--debts that (1) don't exist for the most part and (2) aren't your debts.

Moreover, these courts are being run as quasi-military tribunals in military districts, under the pretense that the "American Civil War" was ever an actual war.

It wasn't. It was never Declared by the actual Congress and no Peace Treaty ending it exists, either. It was and is nothing but an illegal commercial mercenary operation on our shores that has been enforced and promoted by disloyal military commanders and criminals in Congress and clueless Presidents.

So, given the fact that these "courts" are foreign military tribunals here on our soil as the result of an illegal and immoral commercial mercenary action now 150 years old--- and that they are collecting on debts that are odious and fraudulent by nature.....

And given the fact that Donald Trump is now the "Commander in Chief" and able to order the District Commanders to shut these so-called courts down and reopen the courts we are owed....

Why not light a firecracker up Commander-in-Chief Trump's rump and suggest that he do so, post haste? Tell him that Judge Anna can show him precisely how and when this system got set up and how it has been abused, and what his power is with respect to ending the hideous mockery that "stands for" a court system in this country right now.
