

A Tale of Two Islands and a Brief Explanation

By Anna Von Reitz

By now anyone familiar with the so-called "Patriot Movement" --- it should be called the "American Movement" -- knows about Jekyll Island. This is where the plot to form the Federal Reserve and issue Federal Reserve Notes, based on slave labor and indentured servitude, got its start.

We all now know how that has played out. Turns out that FRN's have been illegal since 1926. Turns out the IRS and the Internal Revenue Service have both been illegal this whole time. Everything they've done is criminal. Everything they've liened, everything they've stolen, all the lives they've ruined.

Not everyone is as familiar with Jupiter Island, the HQ for what is more popularly known as "the Bush Cabal". The Bush family has a long and varied history, some of it very good, some of it very bad, and Jupiter Island has figured in most of it. This is the nexus, the Think Tank.

Recently, the remaining elements of the Jupiter Group have tried to figure a way of getting relief owed to U.S. Veterans delivered. That's a worthy cause for many reasons. Let me briefly cite a few:

Soldiers returning from WWII were supposed to receive their own stock portfolios, but those never got delivered because the soldiers were never told a word about this extra benefit. The stocks were managed "for" them, instead, and the resulting money was Slush Funded by the War Department.

Everyone who has served in any capacity since WWII is supposed to be getting two pensions, one from the British Territorial Government, and one from the Municipal United States Government, plus whatever additional services. Do you know any vets who are getting both pensions?

This has all come to light when many U.S. Veterans are struggling to survive.

I have been one of the Principal Parties to bring this forward, so I am concerned and I do care for our veterans and their families, because whether the fight itself was wrong

or right, they are owed what they are owed. They should not be suffering and going without anything, including their freedom once their tours of duty are completed.

The profits from the stock portfolios and the two pensions and extra perks and a good deal more are owed, but I can't negotiate that for them because I am not a U.S. Citizen.

It takes a well-organized and connected team of people who are standing in the U.S. Citizen political status to go in and collect that debt and deploy the proceeds. Enter the Jupiter Group.

We have asked them hard questions and we will continue to ask them hard questions --- and there is no doubt that they get their share out of the deal --- but so far, they are the only ones to step forward and claim the money and work out a plan to get the vast bulk of the funds where the funds belong ---- in the hands of U.S. Veterans and their families.

Especially for veterans who are retired, the solution being worked out by the Jupiter Group can make the difference between poverty and comfort. For those just out of the service, it can mean having a decent future and security on the way there.

There is nothing stopping a U.S. Veteran from collecting on this, whether or not they choose to stay in U.S. Citizen political status. It's like any other "federal retirement" --- once you retire from active duty, you are free to come home to America, declare your birthright political status, enjoy your Constitutional Guarantees, and collect your corporate pension. If you are wise, that is exactly what you will do.

Very soon now, the fiat dollar created by the Federal Reserve will collapse, because it's an illegal domestic currency fronted by the District of Columbia, based on the value of undisclosed contract labor: the enslavement of those merely "presumed to be" Municipal citizens/CITIZENS and the indentured servitude of British Territorial U.S. Citizens.

That's a good thing. It means that millions of Americans will be free again. It means that we will no longer live under the duress of the IRS or the Internal Revenue Service, either one. We will all have lawful money instead of legal tender, and any presumption that we are paupers or wards of the state will be erased. For everyone.

I know that there are good reasons to hold the Jupiter Group at arm's length and to scrutinize what they do, because the heritage of the Bush Clan is a mixed bag, but so far they are the only ones organized and in the right standing to deliver relief that is owed to U.S. Veterans, and the debt is long overdue.
