

## The Sides of a Coin - Anna Von Reitz

By Anna Von Reitz

Ancient Romans were fascinated by the two sides of a coin. Here were two faces of the same thing.... Quite a concept, isn't it?

The two faces of America are the jurisdictions of the land on one side and the jurisdiction of the sea on the other. And to make it more complicated, part of the sea jurisdiction is under the control of the land jurisdiction-- thanks to the so-called reserved powers.

Since 1860 the portion of the sea jurisdiction of America that was entrusted to and operated by the British Monarchs has been operated in fraud.

By Maxim of Law, fraud taints and vitiates everything, even the most solemn contracts known as treaties. Fraud voids all contracts "ab initio"---- "from the beginning".

There is no statute of limitations that applies to fraud.

It's like that scene in "The Raiders of the Lost Ark" where the Holy Spirit of God comes out of the Ark of the Covenant and destroys the evil Nazis, leaving Indiana Jones and his girlfriend at peace.

This is the Truth about fraud, and it is universally acknowledged, yet nobody quite seems to know what to do about a fraud this monstrous, this big, impacting virtually everyone on Earth.

Let's begin by assuring everyone that there is still an American government and that that honest government is responsible for the land jurisdiction of this country. The whole confusion and uproar is on the "other side of the coin"---- that portion of our government operating in the international jurisdiction of the sea that was entrusted to King George and his Successors. So let's examine the situation.

The British government kept control of our international commerce (which is business between incorporated entities), our trade policies, our military, our coinage, and provided all the other services that we associate with the nineteen enumerated powers delegated to the federal government which was always as foreign to us as the government of Scotland.

If you never bothered to read or think deeply about The Constitution for the united States of America, please do so now, paying special attention to Article I Section 8 Clause 17, Article IV, and Amendment X.

The British were supposedly here to provide us with "essential government services", under contract and under condition of trust obligation. In exchange for all those powers, George III agreed to act as our Trustee on the High Seas and Navigable Inland Waterways and to protect Americans and American vessels in commerce. (We are considered to be vessels engaged in international trade, not commerce, and our consciousness is our cargo.)

To accomplish this feat of political and commercial compromises, a constitution--- a debt agreement--- was agreed to, but in 1819 the upstart Americans decided that the members of the British Bar Association were not to be trusted and they passed the Titles of Nobility Amendment (TONA) in that year. Ever since, members of the Bar have been precluded from serving in our land jurisdiction government in each state and county, but not the portion of the federal government provided by Britain.

Say what? By now, your head is spinning as you realize that there are members of the Bar sitting on every city council, every assembly, every school board, every state legislature and yes, in the Congress. And they shouldn't be there, except for one thing. They have incorporated the old county and state governments and redefined them as franchises of the parent federal corporations doing business as the USA, Inc. and the UNITED STATES, INC. --- not the actual land jurisdiction government owed to you and to this country at all.

So, what you think of as your government is not your government. It's their government pretending to be your government. According to them, we are a nation of 350 million public servants, all here to provide essential government services.

There is the word that you need to keep your eye on: service.

Military service....  
Banking service.....  
Postal service....  
US Marshals service....  
Legal service.....  
And so on.....

Absolutely every power this foreign entity exercises is a delegated power that they have been allowed to exercise under conditions of contract and trust, which they have violated and breached via semantic deceit, secrecy, and fraud.

So much for the "delegated powers"---- the federal corporations and the federal citizens responsible for providing the services and exercising the delegated powers have failed us, failed their duty, and participated in premeditated racketeering, abuse of bankruptcy protection, and fraudulent hypothecation of debt against us and against our assets.

It was the obvious intent of these monsters to levy their own debts against us and our assets as presumed sureties, and to discharge their debts in bankruptcy---- leaving us and our children's children to pay for it.

These are acts of crime executed against the American states and people by their own employees under conditions of fraud and breach of trust; but, remember these are all "delegated powers" and those who

delegated these powers--- the American states and people, their heirs and assigns --- have their own ship of state which is reserved to them, their own language (American English), their own law (American Common Law) and their own republican form of government, and all the rest.

Please keep it fixed in your mind that the "federal United States" which includes both the Municipal United States and the Territorial United States are foreign with respect to us.

They can have their own language(s) --- their so-called "Federal Code" --- and they can have their own "states" called "states of states" which are franchises of deceptively named parent corporations doing business as the USA, Inc. and the UNITED STATES and more recently, THE UNITED STATES OF AMERICA. They can run their affairs as corporations, they can have their own offices, they can hire their own courts, they can promote political parties, they can hire the members of the Bar Associations and carry on however they wish, and as long as they are working for us, they can fly our flag under delegated power---- and none of it has anything to do with us, the actual Americans.

Let that sink in.

Your United States of America has never been bankrupt. Theirs has. Repeatedly.
