

# Think About What You Are Thinking

By Anna Von Reitz

If you don't know the actual history of your own country, how could you expect to know the history of the solar system and galaxy you live in?

Do you realize that the Universal Field Theory was proven back in the 1920s? If not, that puts your knowledge of physics a hundred years in the past.

You have been deliberately dumbed down and kept in the dark by people who sought to keep you ignorant and vulnerable to their lies and self-serving misrepresentations.

And it's not just lapses about American History.

This planet was built by our Creator, who designed our DNA and everything else needed to define and sustain and care for us. We are all in receipt of a gift, our DNA, which is 13.8 billion years old.

If you want to begin catching up on the science and planetary history and want a people-friendly teacher and guide, I suggest you begin by studying the material provided by Gregg Braden.

Gregg and a group of researchers at Harvard startled the world by announcing that our DNA contains coded messages that come directly from our Creator.

This astounding news barely caused a ripple thanks to mainstream media suppression.

Suffice it to say that The Ancient of Days, God, is no longer a theory or a religious belief. We know his name. We bear his signature.

The "book"---our DNA--- whose mysteries were sealed until the End Times, has been opened.

The Deception and The Great Fraud ultimately goes much deeper than forgetting to tell you the end results of the Civil War.
