

Three Public Trusts -- Only One of Them is Yours

By Anna Von Reitz

There are, or have been in the past, three intestate public trusts created using some version of your name.

Only one of these trusts, the American Infant Decedent Estate Trust is yours, and the Perpetrators are trying hard to hang onto that, and keep your estate under their control.

They propose to use the British Seaman's Estate Trust as the lure and distraction, to attract you and fool you into accepting the small amount of money left in that account as settlement for what they owe you.

Meanwhile, they have returned all the substantial assets and assignments to your American Infant Decedent Estate Trust, hoping that you will be fooled and stop short of pursuing this prize --- for if you do, you will leave huge amounts of assets and credit under their control, and content yourself with pennies.

The plain fact is that you are an American and have always been an American and any attempt to illegally latch onto you and change your political status to that of a British Subject is just that --- a crime.

Make up your mind to come home and to come all the way home. Don't stop and don't be deflected or attracted to any red herrings on the way.

The only true peace, power, and protection lies in returning to your original birthright political status as an American State National.
