

From My Lips to Trump's and Putin's Ears

By Anna Von Reitz

In less than a day! That has to be a record!

I was explaining to a group of nations that the Federal Reserve Note is not an American Dollar, despite pretensions and confusions otherwise.

An American Dollar is made of silver and is the non-speculative currency underlying the world economy as the reserve currency.

The Federal Reserve Note is a private military scrip issued by the British Territorial United States and is a domestic currency that should never be used as an international currency at all.

All international currencies are backed by silver or gold, but that is not what backs Federal Reserve Notes.

The Federal Reserve Note is backed by the labor of slaves and peons. It is blood money, and both slavery and peonage have been outlawed worldwide since 1926. That is just one of the problems attached to the Federal Reserve and the Federal Reserve Note.

The Perpetrators try to excuse this and lie through their teeth, claiming that this enslavement and peonage is all voluntary and consensual, but it's not. Instead, they operate via adhesion contracts and non-disclosure, and racketeer against the victims under color of law.

Chase Bank acquired the trademark name "FEDERAL RESERVE" and JPMorgan acquired the trademark/name "FEDERAL RESERVE BOARD OF GOVERNORS" in 2017 as part of the Settlement of the Federal Reserve System bankruptcy.

As Aldous Huxley said, "Facts don't disappear just because they are ignored."

The actual Federal Reserve, of course, continued to function quite apart from the collapse of the Municipal Corporation bearing the same or similar names, but the trail of debt and dishonesty remains the same all the way back to Abraham Lincoln and the ill-fated Lincoln Greenback and the 10/40 Bonds that supported its issuance and don't forget --- Salmon P. Chase, Secretary of the Treasury from 1861 to 1864, namesake of Chase National Bank, Chase Manhattan Bank, JPMorganChase.....

Yes, it's the same exact "1040" association that you are thinking of, except that instead of you freely investing your money in a government bond and being paid back with interest after either ten or forty years, you are simply bilked out of a large portion of your yearly earnings to purchase Treasury Bonds that support the kleptocratic "Federal" bureaucracy and all the agency subcontractors our Subcontractors have hired to help themselves --- for example, the ill-named "Department of Justice" and the "Federal Bureau of Investigations" and so on.

If all the problems with the Federal Reserve (which would smell as bad by any other name) and the Federal Reserve Notes ended there, it would be bad enough.

We've had six generations of Americans enslaved and harassed by none other than the Spanish Inquisition, imported by the Commonwealth of Puerto Rico, and unleashed upon us as "the Internal Revenue Service"--- all to support Treasury (Labor Performance) Bonds that have been outlawed worldwide for almost a hundred years and Federal Reserve Notes based upon those bonds.

Most of the victims had little or no "Federal Income" to tax, but were taxed upon the whole of their private earnings nonetheless.

The object of all this criminality was to use our labor as collateral supporting the Federal Reserve Note.

Our labor, our energy, our inventiveness, our skills, our educations, our very time on Earth was taxed by these Criminals to pay back their Federal Reserve Note I.O.U.'s and we were forced under color of law to accept these I.O.U.'s as "legal tender" when the tender and the source of it, was anything but legal or lawful, either.

Just today, Mr. Trump and Mr. Putin have agreed with me that Federal Reserve Notes, a British Territorial domestic scrip derived from enslavement and peonage, have no place in international trade or commerce.

Imagine that?

Next they need to agree that such a nasty antiquated system needs to go away --completely-- and have no place in the modern world, however, as I can also attest, they have no workable replacement to offer.

The best they could come up with is another bid to enhance their own power--- a "digital currency" system that would enslave and surveil everyone in new and even more arbitrary ways.

Remember Nancy Reagan, shaking her head and intoning, "Just Say No!" ----?

A "cashless" society is also an enslaved society, so what they are offering is no better and in some ways worse than what we are leaving behind.

The Americans are owed their entire estate back, plus interest, and that includes their freedom and their Constitutional Guarantees, and their Silver Dollar currency and their land Patents and Grants and Treaties and all the rest of it. We are owed peace and good faith service. Our privacy. The security of our persons. And a great deal more.

We have not engaged in any wars since The War of 1812, so it also follows that all the "war reparations" that have been paid out by Americans are just more odious debt. The reparations were extracted as mortgages owed by the Territorial and Municipal state-of-state operations and via bogus property taxes, so that, too, needs to come to an end.

In the actual Wizard of Oz books, Dorothy's slippers are not made of rubies. They are made of silver.

Consider my silver (and gold) heels clicked three times and be sure that the "Magic Words" have been said.
