

Public and International Notice to the World Health Organization (WHO)

By Anna Von Reitz

Issued [January 9th, 2023](#)

The American Public is not subject to or bound by any arrangement which has been signed by Joseph R. Biden, or any member or officer of his corporate administration, agreeing to amend our borders or accept World Health Organization Protocols.

There is no authority granted to Mr. Biden in his capacity as "President" of the "White House Office, Inc." to do or say anything on our behalf or to make any contractual agreements for this country.

If Municipal citizens of the United States agree to accept World Health Organization authority over their private and public health care decisions, that applies only to direct employees of the Municipal Government corporation within the confines of the Washington, DC Municipality.

It does not apply generally to the Public nor to Territorial Employees nor anywhere within the borders of our States.

We are issuing this Notice to prevent any possible misunderstanding related to the nature and extent of Mr. Biden's authority, and specifically calling your attention to the strict limitation of that authority with respect to Americans.

He can tell his employees to paint themselves purple or commit suicide and it will be up to them what they endure for a paycheck.

The rest of us are under no such compulsion to obey or comply with any demand made by the Biden Administration or any foreign corporation, such as the World Health Organization.

Thank you very much for your time and attention.

James Clinton Belcher, Head of State

The United States of America
