

The Truth About Dunford -- Get Ready

By Anna Von Reitz

Okay, everyone, I want you to stand ready.

General Dunford is making a gigantic mistake.

He can't readily process new information that comes from outside his particular area of expertise and he can't quickly or easily adjust his basic assumptions---- even when he is shown the truth in black and white.

He doesn't know that America is not the "US".

He doesn't know that America has two flags --- the Stars and Stripes war flag and the Civil Peace flag.

He doesn't know that the "government" he thinks he owes allegiance to is in fact a foreign territorial government that is simply under contract to the actual government he is supposed to be serving.

He doesn't know that he and millions of other Americans have been conned and defrauded.

And the list of other things he doesn't know or can't accept could stretch from Alaska to Boston.

As a result, he is doing all the wrong things, the wrong way, and with the wrong people.

He is colluding with the same old Rothschild Bank of France crooks who own the Federal Reserve and who caused all the problems in the first place.

He is looking for opportunities to start a war for profit, because they have lied to him and convinced him that we are broke.

It's actually just crooked bookkeeping and if he leaned on them to audit the "Fed" instead of buying into their bull, that would be readily apparent.

So he and Trump think they are saving America, when in fact what they are doing is being susceptible to self-interested crooks and, once again, leading America down the primrose path to war and misery and destruction for the whole planet, because they have run out of casino chips.

It apparently never occurs to them that they already own the casino and the chips and that they are perfectly capable of issuing their very own script and keeping their own books.

But that is neither here nor there at this point--- the point is that we all absolutely have to get busy. All hands on deck.

Those of you who have contacts into the White House and the Pentagon and other offices --- get ready. Look up those emails, dust off those letterheads. Figure out how you are going to get a

single, very simple, very important message into Trump's hands, into Dunford's hands, into the hands of the UN Secretary-General, and to political and church and military leaders throughout the world.

That one message can and should change everything.

It's only a single sheet of paper. What it says is not hard to understand.

And you need to get ready to deliver it, by hand if necessary.
