

Trying not to lose my property

By Anna Von Reitz

Anna answers the following question from one of our readers.

"Howdy Paul , I was trying to offset some debts. Had some luck with an A4V, offset 39k of student loans. But have had no success otherwise. Trying not to lose my property. What do you know about the BC and Indemnity bonds? I really appreciate your time and I would like Anna to know the same. I am very much grateful. Respectfully, (Name Withheld) "

Answer from Anna:

Paul-- I am in a location with very poor internet reception. You will probably want to post this as a separate article as everyone needs to wrap their head around this situation.

Any debt that is from a public lender --that is, an incorporated business- is subject to discharge. Private debts are not.

The vermin responsible seized upon your private property- your name-- and created unauthorized franchises named after you. This use of your name was unconscionable and non-consensual. In order to make it legal they had to indemnify you against loss or damage --that is, insure you against loss or damage resulting from their use of your property. Also, if they confiscate any of your assets they have to pay you fair market value. All that is required and set in cement by the Lieber Code and Hague Conventions and spelled out in Army Regulations AR 27-20.

They just never told you and never made it possible for you to claim your Indemnity.

So when they force you to pay off their mortgage you have the right to discharge it via the Federal Treasury Window but instead you are misled into assuming that it's your mortgage-- you are deceived and defrauded into paying off the government corporation's debts for them and the guilty banks facilitating this gross fraud don't even bother to report all this "Gift Income" to the IRS.

Here is what is supposed to happen:

They bring you the Bill, you approve the charge, they take the signed Bill to the TTL Officer at their bank, he sends it by certified or registered mail to the Treasury attention Steven Terner Mnuchin or his Successor with a Return Receipt Requested Green card. Sixteen days after the date received shown on the return receipt (the green card that comes back to the TTL Officer) the local bank is authorized to deposit credit into the Billing Party's account equal to the charge they presented.

You are put in the middle to keep the Billing honest-- you are NOT required to pay the Bill.

But since absolutely nobody ever told you any of this you have gone on slogging along paying bills that you are insured against and that were never actually yours to pay since the governmental services corporations claimed to own everything --including your Trade Name and they are in truth and in fact accountable for every charge they have made against you and your assets.

All this is handled by the Billing Party's bank and the US Treasury. All you have to do is check the bill over and authorize payment .

Anything that can be bought with credit can be paid for in this way with credit.

And this, legally, is what the banks and the corporations have been obligated to do all along and the way this system was supposed to be working all along.

This service department within the US Treasury is called the Seventh Department of Extraordinary Finance, but because you were never told how to access this means of indemnifying yourself against loss as a result of their use of the government franchise's NAME on your paperwork and never informed that you were paying off a government mortgage taken against your property-- you assumed that it was your own mortgage you were paying.

Not so. The bank shifted the entire weight of the government's debts off onto our shoulders and never said a word. The government kept mum, too. But the truth of the matter is that the filthy buggers in Congress told outrageous lies about you and their relationship with you. They borrowed huge sums of money against your assets, never told you, and never told you that you were supposed to be indemnified against the harm of these venal practices via "mutual offset credit exchange" and deposit of credit from the US Treasury to pay all the Bills addressed to YOU.

So Congress had you suckered into paying all their whims and you didn't have a clue and the banks were not doing their job and not informing you, either.

It's nothing but a giant identity theft and Ponzi Scheme with you targeted as the Fall Guy, being foisted off on you by the members of "a" "US" Congress that also conveniently did not reveal that it was acting in behalf of the Territorial United States and not the "United States" that you naturally assumed-- a foreign British-backed "Congress" that did nothing but serve itself at your expense for 150 years.

And the Kings and the Queens and the Popes acted in Gross Breach Of Trust, sat on their asses and raked in the profits from all this guile and fraud.

Generations of people worldwide have been hoodwinked and enslaved by these hidden commercial interests operating under color of law for the profit of a very few. And now it is time for "the System" to work the way it is legally mandated to work and for the guilty parties and banks to pay up or be liquidated.

Mnuchin needs to bulk up his staff and vastly reorganize his mailroom.
