

## International Public Notice: Use the ILRPS

By Anna Von Reitz

Since the beginning of our work describing and documenting the outrageous fraud schemes which have been employed to deceive and defraud nearly everyone on Earth, there has been a need for people to step forward and identify themselves and assert their political status.

What we found was that most land recording offices were either already shut down or in the process of being shut down, so that in many countries there was no longer any official public means of recording such information.

And those recording offices that stayed open were largely guarded by British Bar Attorneys acting as attack dogs, telling clueless bureaucrats that they couldn't record claims for other kinds of land assets outside the Queen's Land Title System.

This isn't true; in fact, the living people native to a country are all land assets under international law and they all have property interests in land assets.

In truth, only living people can own anything physical. Corporations and Queens can only act as custodians of physical assets, which requires that the physical assets in question be placed in trusts.

In the minds of the colluding Bar Attorneys, all the living people in our country had been unlawfully converted into "persons" as a result of undisclosed citizenship contracts foisted off on them while they were still babies in their cradles.

So it appeared to the British Bar Attorneys that we were presenting ourselves as competing trustees, trying to seize upon a trust that the Queen had already created and seized upon -- when in fact we were groggy crime victims, reclaiming our own assets, and so-called "reversionary trust interests".

Thankfully, international law and custom and tradition held firm enough for us to secure the recording of our claims; the only final reply the criminals could muster was to continue to shut down land recording offices and functions, so that people had little or no means to establish and prove their identities or their claims to their assets.

More recently, they have tried to destroy the public records created by the Municipal Corporations in this country including Uniform Commercial Code Units, in an attempt to hide even these records and claims.

In the face of this opposition and obfuscation and refusal to provide land recording and claim services, people were reduced to publishing their political status and identity in public newspapers, but then, the newspapers were told they couldn't publish such notices and those who continued to press their "reversionary trust interest" and claim to own their own names and private and public property interests, were harassed and beaten, subjected to false claims in court, impersonated, and otherwise harmed by the miscreant Bar Members.

So, we began to provide our own International Land Recording Services for Americans -- the Land Recording Offices were opened in every State and at the service of every State Assembly.

But what about the rest of the world? Investigation in places as far-flung as England and Egypt, Hong-Kong and Barbados, Argentina and Zimbabwe, all showed the same conditions --- people being deprived of any means to publicly record their interest in their own physical property.

The International Land Recording and Publishing System was created to fulfill this need on a global basis and provide a means for everyone worldwide who has suffered from identity theft to: (1) be able to prove who you are and where you come from; (2) claim your "reversionary trust interest" in public trusts used to cashier your assets without your consent; (3) have a credential card that is viable worldwide; (4) have a bank account that is viable worldwide.

Everyone deserves to own their own name, their own land, their own homes and businesses, without being "presumed upon" by foreign governments and commercial interests.

Everyone deserves the freedom that goodwill and good behavior earns.

Everyone deserves peace and protection from commercial mercenaries and pirates.

Everyone deserves honest banking services and free access to trade and commercial markets.

So the International Land Recording and Publishing System provided by the Global Family Bank gives everyone worldwide the ability to establish your identity and get a free ID card, establish your claim on your own Good Name and property interests, and finally, access to your own bank account and gold-backed asset currency.

It's a win-win-win, and long overdue.

The more of us who do this, the more the living people who desire peace and abundance and compassion are empowered.

So if that describes you -- if you desire a world at peace, a world based on truth and justice, a world in which compassion is practiced --- this recording system is for you, worldwide.

It's our free gift to you.

Americans already have their Land Recording Offices open, and should be using them, too, to obtain State Credential Cards --- but everyone, everywhere, now has access to credentials and banking services provided by the ILRP Service.

You don't have to wait and hope and worry anymore.
