

The Wage of Fraud

By Anna Von Reitz

The wage of fraud is confusion.

Let's straighten out everyone's thinking right here and now.

No actual government can be incorporated.

The reason for this is that the moment you incorporate anything, a charter is issued by another, different sovereign entity---thereby subjecting it to the authority of the other sovereign.

Scotland can't issue a charter for the actual government of America. At most, the nasty vermin can infringe on our international copyright and create a commercial corporation doppelganger. Which is precisely what they did in 1868 and what they are trying to do now.

And as for Keith Livingway and T-Roh they are trying to capitalize on the original Scottish fraud of 1868, trying to say that they bought an interest in that defunct Scottish commercial corporation and therefore now own America.

Good luck with that bull crap.

"The United States of America, Incorporated" created in 1868 in Scotland was chartered by the Scottish Government, not the American Government.

And this defunct Scottish entity owes us a helluva lot of money. It's just a matter of how hard we want to press the issue of their fraud at this late date. Bank of Scotland, do you hear me? BIS?

As you can see, it isn't even possible for any entity incorporated by any other government to be our government.

And it is the same way for the "United States of America" Inc. chartered by the Roman Catholic Church in Delaware in 1925. That entity is subject to Delaware, which is obviously not able to act as "the" government of this country.

There is one and only one lawful government of this country still standing in international jurisdiction, and that is The United States of America [Unincorporated] and the member States ---- Wisconsin, Kentucky, Maine, Texas, and so on.

The Universal Postal Union knows that it has contracts with the unincorporated version so none of the idiocy being promoted by Keith Livingway and "T-Roh" will be honored.

A incorporated entity acting "as" a government is not a government.

Because the fraud artists created all these deceptively named incorporated entities in foreign countries there is a lot of confusion. Most recently we have had to deal with "The Republic of the United States of America" (France) and "THE UNITED STATES OF AMERICA" (Scotland--- again!)

But all these incorporated impostors are not our government and can't be our government. They are merely identity thieves trying to get a governmental services contract by a process of "assumption" long after we have told all of them, including Keith Livingway's group, thanks, but no thanks.

All this fraud has to end.

Apparently, some officers in the military thought that because there was a "Grand Army of the Republic" that there had to be "a" Republic, but in fact, the lawful government of our country in international jurisdiction is now and has always been a Federation of States (not a Confederation of States of States) operated in tandem with state Republics---- fifty of them.

So, please, everyone, get your heads clear on the subject of sovereignty and subjection. Incorporated entities are always 100% of the time subject to a sovereign entity. I think all Americans can agree on the fact that our government is not now and never has been chartered by Scotland or France.

Let's bring all this confusion to a halt and end all the fraud as well.
