

Waking Up 101 Revisited

By Anna Von Reitz

Imagine someone who is mentally insane, and the essence of their insanity is that they can't tell the difference between their own body and someone else's. When they get mad, they punch the guy in the mirror and then wonder why it hurts so bad. Then they get even angrier, and punch "him" again, and wind up on the floor in the bathroom with a concussion several hours later, with no idea what happened or how.

That's how some patriots are reacting to the news that the federal government is just a governmental services corporation in the business of providing us with essential government services (Article IV). They can't quite wrap their heads around it, even though it has been hidden in plain view for over two hundred years--- and they continue to be confused about who is who. They get angry at the federal government and its "federated state" franchises which are part of the federal corporation---and they bash themselves and other patriots by mistake.

They don't know who they are, so they don't recognize who anyone else is, either. Like the insane man, they start making assumptions and punching away, with much the same result.

There is no New Republic. There is just another Rothschild-funded services corporation operating under a new name. I wish I could say that it was under totally new management, but it isn't. And no, it is not our government. It is not and it never was.

It's their government--- a foreign government belonging to and operated by foreigners in our midst---- foreigners who are merely under contract to provide us and our states with stipulated services. If we don't like the service, we have to stand up and identify ourselves as non-citizen American State Nationals, stop voting in their elections, stop using their private corporate laws known as codes and statutes, and stop allowing them to presume that we are "citizens" owing our service and allegiance to their Queen and their municipal corporations.

Let's get the basics down. The federal government operates out of the District of Columbia which belongs to all states and to no states. It is its own turf and has its own laws. Inside this is District is the Municipality of Washington, DC, which operates as an international city-state. It is also its own turf and operates under its own laws.

And both of these foreign entities with their foreign governments are perched on land that was provided to them by Virginia and Maryland as part of the peace treaties and other agreements coming out of the Revolutionary War. The Congress acting as a corporate Board of Directors operates the affairs of the District of Columbia as a democracy (which is completely foreign to the republican form of government the states and people owe themselves) and also operates the municipal government of Washington, DC, as an oligarchy.

These are both foreign nations and foreign governments co-existing on our soil.

The government of the District of Columbia has operated as a corporation known as the "United States of America" since the Civil War. The government of Washington, DC, has operated as another corporation doing business as the "United States" but actually formed as the "District of Columbia Municipal Corporation".

These two corporations have franchises that they operate in both the names of the people and the states.

They have been used to fight each other in commercial wars over the past century and a half ----wars in which we and our actual states are naturally non-combatant Third Parties.

Unfortunately, we have been deliberately mischaracterized and mistaken as combatants in these "wars"--- as if we knew a thing about these corporations and their various mergers, bankruptcies, attempted takeovers. etc., and chose to be actively involved in their affairs.

Technically, the only job, role, or reason for existence either of these two foreign entities have for being here, is to provide "essential government services" under Article IV of the actual Constitution ----to your actual states-----and only secondarily, in a subrogated fashion, to you.

"State of Florida" is a separate and foreign entity from the "Florida State" and the municipal version operating as the "STATE OF FLORIDA" is again a separate foreign entity apart from either the "State of Florida" or the "Florida State". These States and States of States and Municipal "States" are all as foreign to each other as Spain and France and Denmark.

The United States of America operates under Federal Code. It's franchises operating as "States of States" operate under private, copyrighted, corporate state statutes. Remember that the word "of" here means "without" so the phrase "State of Florida" translates as "the state without Florida".

The "State of Florida" is not within the Florida State you live in, because it is a foreign state populated by British Subjects, operating as a Democracy, co-existing in our midst---- supposedly only to serve the actual Florida State and its republic and people, but in fact is serving itself at your expense because you have failed to ride herd on your own employees.

So it stacks up like this: United States of America is a corporation operated by British Subjects, for the purpose of providing stipulated services to the subscribing

actual states of the Union. These British Subjects are called "United States Citizens" and they owe their allegiance to the British Crown.

This corporation has its own internal government, which serves the British Subjects and operates as a Democracy and which with respect to us and our states is obligated to operate exclusively in international jurisdiction. Internally, of course, it has its own "government" and it also provides governmental services to its own citizenry via its network of "states" such as the "State of Florida".

The UNITED STATES, INC., is a doing-business-as name of the old District of Columbia Municipal Corporation, another and separate foreign government that operates as an oligarchy run by the members of Congress out of the international city state known as Washington, DC. This entity has citizens called "citizens of the United States" which are all either "orphans" or corporations of one kind or another: JOHN MAYNARD DOE, JOHN M. DOE, GENERAL ELECTRIC, INC., STATE OF IOWA, etc.

The confusion that results from having all these separate foreign entities and states operating under names that are deceptively similar to your own actual nation-states and foreign doppelganger "persons" operating under names deceptively similar to your own--- is self-interested fraud. None of this chicanery has nothing to do with our organic republics governed of the people of this country, yet Americans typically can't tell the difference and are left shadow-boxing with unknown opponents or bashing each other or bashing ourselves by mistake.

And if we can't stand on our own two feet and discern the difference between us and these British Subjects and these foreign Municipal "CITIZENS" named after us---- how can the rest of the world make heads or tails of it? It's like the old Laurel and Hardy skit---- "Who Is On First?" --- in which the question turns out to be a statement, because the man on first base is called "Who".

People see me, operating under American Common Law as a Justice of the Common Law (popularly called a "Judge" by mistake) and under Article X of the actual Constitution--- and mistake me as a Bar Attorney acting under admiralty or corporate administrative law. They can't discern the profound difference between the two.

They see Americans taking up their rightful role and duty as American State Nationals and they continue to presume that these people are "citizens" subject to The Constitution in some form, or to the foreign Federal Code as British Subjects or municipal "CITIZENS" subject to Municipal Code--- when in fact none of these codes, rules, private statutes or even constitutions apply to non-citizen State Nationals.

So let's give you, members of the American People, some helpful guidelines and pointers to sort through all this corruption.

1. Your rights do not come from any constitution. They come from Nature and Nature's God.
2. The Constitution exists to define and limit the activities and prevent the over-reaches of the federal corporation, its corporate officers, their employees and their franchises, no matter what name they use.
3. The Constitution is called "the law of the land" because it is the law that the British Subjects operating in the international jurisdiction of the sea must obey when

they step foot on our soil. They call it the "law of the land" from their perspective as foreigners operating in the international jurisdiction of the sea. To us, it's just the agreement that our states made to allow these cretins to be here and perform these duties.

4. Until and unless we get busy and re-negotiate the actual Constitution through our unincorporated states of the Union, these foreigners have work to do and we are not in a position to object to their continued operations so long as they abide by the rules of the actual Constitution with respect to us and our states and take note that no "Successor" organization merely assuming the duties of the federal government has a contract beyond a quid pro quo of reasonable payment for reasonable stipulated services provided.

5. You are known as a "non-citizen State National" ---- an Ohioan, Virginian, Texan, etc., and you have no obligation to serve any government as a "citizen". Instead, the government has an obligation to serve and protect you-- which is an obligation these foreign entities attempt to avoid by mischaracterizing and mis-identifying you as a "citizen".

6. Over time, the foreigners who are supposed to be here helping us by providing us "governmental services" in good faith, have usurped upon us and mimicked us so as to confuse themselves with us.

7. They have worked this confusion to their benefit---- used it to access our credit, to trade upon our good names, to control our commercial operations, dictate our foreign trade, and subject us to their rules under false presumptions and false pretenses.

8. Most Americans have been "seized upon" while still babies in their cradles by undeclared Foreign Agents working for either the foreign United States of America, Inc., or the equally foreign municipal government of the UNITED STATES, INC. and have been mischaracterized as a "citizens" of one or the other.

9. The word "citizen" means that you serve the government, instead of the government serving you. You are not born as a citizen, but you are converted into being a "citizen" by legal chicanery and deceitful undisclosed contracting practices of the federal and municipal corporations. This presumed political status has to be objected to and rebutted.

Until you make your political status choices clear and clean, stop taking refuge in "The Constitution" --- because until you overcome the presumption that you are a "citizen", not a single word of The Constitution applies to you. On top of that, you are not a party to The Constitution---- not directly.

The only enforcement of The Constitution comes into play when you (1) rebut and object to the presumption that you are a "citizen" of the United States in any way ---and cease operating as one---- stop voting in their foreign elections, stop paying their foreign taxes, stop using their foreign laws----- and (2) form your jural assemblies as organic communities, counties, and states of the Union and operate the land jurisdiction government you are owed.

Which Union?

The Union of free nation-states formed under the original and never repealed Articles of Confederation (1781) and again under The Articles of Confederacy (1860).

Any "Union" formed by "federated" State of States franchise corporations following the Civil War is nothing more than an association of franchisees seeking commercial enrichment, akin to a "union" of oil producing nations or orange growers.

Getting back to our insane man, punching himself in the face----

You, a birthright American State National, are not a "United States Citizen" nor are you a municipal "citizen of the United States". You are naturally a Third Party to all these corporate shenanigans and the proliferation of corporate franchise doppelgangers --- "persons" ----operated in your name by strangers.

Any and all presumptions that you are a "citizen" belonging to one or the other or both of these corporations are foisted off on you almost at birth, and only you can stand up and say, "No, not me. I'm exempt from all your presumptions and corporate infighting. I am not a British Subject. I don't agree to act as a Municipal franchise or franchisee. I am owed my self-governing Republic and I claim it and operate it as an American State National."

You are not obligated to follow any Federal Code. You are not bound by any federated "State" statute. You are not a "person"-----that is, an incorporated entity merely named after you.

You are one of the people who are owed every square centimeter of soil and the use of every Public Law for your private purposes.

Recently we've had some more "misunderstandings" within the patriot community about who is who and what is what. We've had people making wrong assumptions about the identities and roles of the various parties and given the vast and purposeful confusion created by deceptively similar names and years of being indoctrinated to assume we are all "citizens" and acting as "persons" this is understandable, but cannot be allowed to stand.

The actual Constitution grants the federal corporation exactly nineteen services to perform (and this also limits their "State of State" franchises in the same way---the parent corporation cannot give authority to its state franchises which it does not possess itself) and reserves all other rights, powers, and prerogatives to the states and the people under Article X.

Everything that isn't specifically delegated remains with us and with our states.

When you look at The Constitution with a jaundiced eye, you will see how vast the remaining authority and responsibility under Article X is. You will also see how you, as an American State National and your organic state of the Union, hold the ultimate power to enforce the limits of the constitutional agreement and put an end to the false practices and presumptions which have been employed by foreign governmental services corporations against your interests and the interests of your organic state of the Union.

Upon your first waking up to the facts, please do not mistakenly continue to presume that you or anyone else is a "citizen". Make the opposite presumptions----that most of the people you see and interact with are actually American State Nationals who have been bamboozled and railroaded into serving as citizens against their Will and without their knowledge or consent. Flip it all upside down and on its head.

Remember that in an actual Republic, the flow of power is from the bottom up.

All power is vested in the people of this country. They delegate a little to the county governments, which delegate a portion of their responsibility to the state governments, which delegate a portion of their power to the federal government. Not the other way around.

When the power flows in the opposite direction--- from a few oligarchs vested as executive officers and cabinets of experts and politicians--- you should know for sure that this is NOT your government ---- and other than making sure that the federal corporation fulfills its duties and obeys its limits---- it is not your concern, either.

They are under contract. They are in fact subcontractors.

Your only responsibility is to run your own actual organic state government and make sure that whoever is running the federal corporation---- be it Trump or Hillary or Paul Ryan---- and whatever they are calling themselves this week---- United States of America, United States, or New Republic---- they obey the stipulations of the actual Constitution and they stop mischaracterizing and creating false legal presumptions against their employers: you, your family, your friends, and your neighbors.

Hold them feet first to the fire and organize you local communities, unincorporated counties and unincorporated states to do it.

Merely changing the management or name of a governmental services corporation does little or nothing to address the actual problems and "missing pieces" to this puzzle, which all depend ----not on any externality---but on you remembering who and what you are, taking up the work before you, and joining with others to get the job done.

In order for Checks and Balances to work, there must be American State Nationals balancing out the United States Citizens. There must be actual organic states of the Union organized as Jural assemblies and Fiduciary Deputies to hold the federal corporation(s) at bay and on task. There must be actual unincorporated counties to support the organic and unincorporated states of the union.

As American State Nationals you are uniquely responsible for creating, staffing, and supporting the Body Politic that actually owns and should be operating the land jurisdiction of the United States. It's a job that only you can do and a vision that only you are heir to: it is called "self-governance".
