

# International Public Notice: To the White Hats, Red Hats, and Alliance

By Anna Von Reitz

Please be aware that there is a difference between grants, patents and titles, which parallels actual ownership, use permits, and honorariums.

Grants = possession and substantive ownership.

Patents = use permits to business interests.

Titles = honorarium use by worthy tenants.

It becomes necessary to fully inform you that British Territorial Employees known to be U.S. Citizens have attempted to misrepresent their American Employers as their own Dependents.

Acting under these self-interested and spurious assumptions, the same criminals who owe us good faith service under contract have established a number of foreign public trusts in our names and have illegally and immorally latched onto our American birthright estates, that have been unlawfully converted into so-called infant decedent estates and State Trusts ---- with nobody here being notified.

As part of this usurpation, our erstwhile employees have also presumed to seize upon private family trusts and foundations, along with our land and money and corporate ownership interests.

This in no way changes the fact that we are the heirs of our estates and also the "presumed" donors of these estates, which we have moved to recoup. We have firmly stated our reversionary trust interest and wish to receive back our assets, credits, and good names. That includes but is not limited to our family trusts and State Trust interests.

While you have all been scrounging around and scratching your heads as to how to fund your operations and asking, "What happened to all the assets?" And so far only come up with the idea of raiding the CIA's Five Star Trust or their China Development Fund, please pay attention to what we are telling you.

All actual ownership and right of possession belongs to living people. Not corporations.

The gold, silver, cash, stock interests, and land and soil belong to living people. So does the positive side of the credit ledger represented by the AUTOTRIS account system.

Think about it. We have been compelled via legal chicanery and armed force under color of law to trade our actual goods and services in inequitable exchange for "Federal Reserve Notes" -- that is, Promissory Notes issued by private banks -- for over a hundred years.

Even our credit is prepaid and based on substantive and material assets.

We are obviously the people you need to be talking to and assisting in bringing forward a new monetary system based on truth of ownership and lawful possession of assets.

We are the ones with the "missing" records and ultimate claims.

The bankers have had you all so deluded and twisted sideways for so long that seeing the forest and the trees may be difficult, but is nonetheless necessary.

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents.
