

Whoa!

By Anna Von Reitz

Thanks to everyone who is trying to send donations! --but we need to reroute and send via cash or money order.

Someone yet to be identified tried to set up a business account "in my name" on Cash App. Our internal security system caught this and closed it down, but it still has to be investigated by Cash App. We have sent the necessary information to them.

This activity of setting up business accounts using the names of living people goes along with the impersonation scheme used by the so-called government service providers --- they are attempting to sell "us" off as corporate franchise assets, so some of this is being done by foreign governments and large corporations.

Don't be overly worried. We have been living in a world constructed of lies for a long time. This kind of thing is to be expected as it all falls apart.

We look forward to the day when everyone is automatically held harmless and exempt and all the scammers are out of business.

Not only that, but when I said last week that, to paraphrase, if everyone sent \$5 we would be finished already, a lot of people sent me \$5, which is great, but combined with all the small dollops I send here and there, used up the allotted number of transactions my account can do in a month, so I can't use my account until it renews on September first.

So, long story short, if you want to help, please wait until [September 1st](#), or send checks and money orders to: Anna Maria Riezinger, In care of: Box 520994, Big Lake, Alaska, 99652.
