

## World Take Note!

By Anna Von Reitz

Pay attention to what we are telling you.

There are those who carry the altered DNA of the Orion (Aryan) Super-soldiers on the planet.

These "people" have no conscience, no compassion, no empathy at all. It has been bred out of them.

They are like special-purpose breeds of dogs.

It's not their fault, but it is their condition.

They make up about 5% of the population and until we grow up and learn to recognize and control them, they will continue to promote the kind of senseless savagery we are seeing in Gaza and Lebanon and now, Syria.

Learning to discern these throwbacks and limit their wanton activities is a responsibility of the world's nations and governments and courts and banks—and each one of us.

Look at what the funding and promotion of just a handful of these creatures has cost and is costing the rest of us?

Chairman Mao. Josef Stalin. Adolph Hitler. Benjamin Netanyahu. Abraham Lincoln.

We cannot afford to let these kids grow up without intervention anywhere in the world.

Once we have made the grave mistake of promoting one of them, we have to have the courage to remove them— not because of race or religion or any other factor of this kind— but in response to their lawless criminality.
