

For the General Staff About Nathan Rothschild

By Anna Von Reitz

There are some of you who were very relieved when Nathan Rothschild stepped forward and agreed to front the expenses for the Scottish Interlopers doing business as THE UNITED STATES OF AMERICA, LLC.

You were duped into believing that this country was bankrupt and that you had to go lick his boots for funding to "defend" America.

Not so. Mr. Rothschild and the European banking community as a whole are in fact our greatest debtors and owe the most money to this country, and to our lawful government, The United States of America [Unincorporated].

What they are offering is to give you some of our money at interest and let you work for them, instead of us.

Uh-duh.

Did all your mothers drop you on your heads? Simultaneously? Or are you simply traitors in American uniforms?

What should be happening is that you should be pressing Rothschild out of his ill-gotten "middleman" position and forcing him to not only make our American assets available to the actual American Government --- The United States of America [Unincorporated]--- but also make arrangements to start paying back what he owes us and has owed us since 1840.

Furthermore, even if it means "picking shit with the chickens" for a while, no officer in our military should ever agree to place yourselves or our Armed Forces under the thumb and forefinger of any foreign power, much less a foreign banker loyal to a Queen who is in flagrant Breach of Trust and busily defrauding Americans both at home and abroad.

We do not agree to contract with any of the Rothschild interests, British or French, which means that any money they use to support either "The Republic" which I more correctly call "Le Republique" or THE UNITED STATES OF AMERICA, LLC from Scotland, had better be their own money and not one penny of ours or any penny derived from our assets.

You should all be most anxious to bust loose our assets which are being unjustifiably and illegally held captive by the same bankers who are trying to seduce you into working for them instead of the American States and People.

Anything less on your parts would be disloyalty to the American States and People, which in our book, counts as mutiny and treason against the sovereign States of the Union.

We will also point out that as our Delegated Powers have returned to us via Operation of Law, you need to get a new contract from us to provide us with military services and absent that, you have no jobs.

We will have to hire other military service providers if you don't get your tails in a knot and go get our assets back from the Queen and these endlessly crafty bankers.

You have thirty (30) days to: (a) negotiate a new service contract with us; (b) at our direction and with our help reopen our asset accounts in this country; and (c) get your heads out of your asses.
