

Basic Misunderstanding

By Anna Von Reitz

The People (as opposed to "the Persons") do not "petition" their subcontractors (the "US" in all forms).

The Right to Petition refers to the right of the people to address their own government without interference by the foreign contractors, but at no time does it suggest that we subject ourselves by petitioning any FOREIGN government.

Our government is meant to control and direct THEIR government, but so long as we sit around and LET them run rampant, they do.

Instead of petitioning those meant to be your servants, get on your feet, correct your political status records, assemble your State Jural Assemblies, and TELL them what to do.
