Big News for the World

[The irony is that the world banking community knows the news already; the only shock is that we know the news and have chosen to come forward and share it with everyone else.]

The American states and people own the debt of virtually every government at every level in the entire world--and we are aware of that fact and we are telling the world: hey, stop dealing with middlemen who are claiming to represent us.

No deal they can make "for" us is valid.

In commercial terms, the banks, lawyers, and politicians are not authorized to represent us in the settlement of any alleged bankruptcy, debt, credit, or other matter affecting our role and responsibility as the Paramount Security Interest Holders.

Instead of talking to bankers or politicians -- talk to the actual Postmasters who hold the bank charters and who are fiduciaries of the Creditors. Okay?

This is not rocket science.

For everyone's information, the actual government of this country is an unincorporated Body Politic. Our name is: The United States of America. We operate in sovereign (that is, unincorporated) capacity. We do business as people using simple Trade Names and as persons in charge of unincorporated businesses engaged in peaceful international trade. We are the Paramount Security Interest Holders and Priority Creditors of the UNITED STATES, INC. and all franchises thereof.

Ditto the USA, Inc. and all successors, derivatives, franchises, holdings, and variations thereof.

Our Post Master and Hereditary Head of State is James Clinton Belcher. Our Post Office and Seat of Government is located at Philadelphia, Pennsylvania. The Great Seal of the United States of America and the lesser (delegated) Great Seal of the United States belong to us as sovereign property.

We exercise all international land jurisdiction and retain all non-delegated powers in the international jurisdiction of the sea which naturally belong to the Union of the States of America as an unincorporated Holding Company created by those same states. Our official language is American English. Our official law is American Common Law. Our law is Public Law exercised for private purposes. Our money is the United States Silver Dollar, aka, American Silver Dollar.

We hold the charter on all private banks, all state credit unions, and all international trade banks.

We also ultimately subrogate and hold the charters of all federal commercial banks and credit unions under delegation. We have several accounts at the U.S. Treasury and we basically own the assets of the U.S. Treasury under delegation.

We have established cured claims upon all assets of the various federal corporations and federated "states of states" and we have posted our Private Indemnity Bonds. The name of our National Banking Association is The American States and Nations Bank. We are open for business through all our state credit union facilities nationwide.

Please note that state credit unions are specifically in business to serve "natural persons" known as "people" and unincorporated businesses, and also note that all state (not federal) credit unions are lawful money institutions already and are enabled to accept precious metals deposits and asset-backed currencies.

Anyone having any questions is welcome to contact me for additional details, but it really is as easy as looking up "state credit unions" in the phone book, or, if a state credit union is not available in your area, get together with your neighbors and form one.

The government of the United States by contrast is Territorial in nature. The United States Postmaster General is RUSSELL-J:GOULD. In its delegated capacity, the Territorial United States also has its seat of government located at Philadelphia, Pennsylvania. In its municipal capacity, the Territorial United States also holds a seat of government in Washington, DC.

The United States holds the delegated authority over commercial affairs. As a result, it holds the charters of all the commercial banks and federal credit unions. These institutions all deal with "persons"---incorporated entities and their franchises ---not actual living people.

The fiat currency -- the Federal Reserve Notes, for example, are all issued by the United States in the name of THE UNITED STATES OF AMERICA which is a corporation created by the US NAVY --a municipal corporation and now, a UN Corporation, that has nothing to do with the unincorporated government of The United States of America.

It is merely infringing on our international common law copyright of our business name and trademarks which have been in effect and in constant use since September 9,1776---a situation which is now under correction.

So it is now a matter of public record placed before at least 50 million people worldwide exactly who the Postmasters for The United States of America and The United States are and who exercises the rights and responsibilities.
