

Blue Beam, Green Beam, and Now, White Beam

By Anna Von Reitz

The "Blue Beam" revelation came from Canada, which has long been used by European King Rats to mis-administer our property. There is a logic and history to this misuse of Canadian sovereignty by the Governor of Ottawa and The Chair of the Estates office, but will spare you for now.

Suffice it to say that the perps behind so much of the misery in this world found a way to feather their nests in Ottawa via essentially the same mechanism as some vermin "declared" New York City to be a separate international city-state and used that as a mechanism to promote crime and treason in this country.

Part of the crime issuing out of Ottawa and also Ontario has already been reported: Prince Philip's "erroneous" collection of over \$950 trillion dollars worth of "Life Force Value Annuities" actually belonging to Americans and Canadians.

Another part of the same crime center's activities resulted in Jamie Dimon (J.P. Morgan) defrauding the City of Rome Trust (AUC) of \$479 Trillion that surely doesn't belong to him.

So the Tin Hats (used here as an affectionate and honorary label) who first reported on "Project Blue Beam" --- notably Canadian journalist, Serge Monast, [who died mysteriously of a "heart attack" soon after publishing his findings about a NASA project aimed at faking a "Second Coming" and using that as a means to establish a New World Government under the leadership of an Anti-Christ pop idol] found out about this because they were in Canada and not the United States.

Everything was being staged out of Canada, via the use of these bogus independent international "city-states" being established in violation of Canadian sovereignty --- just as all these huge financial credit swindles have been staged out of Canada. And once again, the villains are the Municipal Government Agencies ---- NASA, NSA, CIA, et alia. which are all private sub-contractors of the Municipal United States Government.

Now, in view of all else that is happening, do you think that the recent "Blue Beam" attacks in which electrical transformers were taken out in plain view of millions of people in New York were "real" enough so that we can dispense with the convenient "conspiracy theory" label and hit the Liars where it hurts?

We have Project Blue Beam in evidence. And here in Alaska, we have "Project Green Beam" too --- just as the sky over New York lit up blue, the sky over Anchorage, Alaska, lit up green just moments before the 7.0 Earthquake.

And last night, here in beautiful Big Lake, Alaska, we had the entire sky light up pure white, three times in succession, brilliant white light so intense that it "faded" out the black outlines of trees.

Now, you can think that the Tin Hats are crazy and call us names, but time after time, the Tin Hats have been proven right and have done the right thing while all the fashionable and "trendy" people have been silly, self-interested fools adept only at infantile lies and name-games and propaganda techniques promoted by Tavistock Institute, now known as "A.K. Rice Institute".

And if I am any judge of things, you are about to see a mercenary "war" between Black Water, now calling itself "Academi" ---- and the former Muni "agencies" ----- to which I say and I warn everyone concerned --- better not take place on our land or affect our people.

We are not "domestic targets" with respect to either one of these groups, and if they bother us in any way, they are guilty of war crimes ----and we are owed the full support and action of the United Nations to put a swift end to them and their activities, under the Geneva Conventions and the ENMOD Treaties.

This is not political, and it isn't going to be regarded as commercial, either. These are criminal activities and will be treated as such.
