

From James Belcher -- False Flag in Virginia

I don't often speak out, but I am doing so today.

The Agents of the Municipal Government (Pope) are planning another attack in Virginia, by which they hope to justify violence and seizure of our guns.

I am going to explain something that every member of the Armed Services and every veteran from every branch of service should understand.

When you enter the Service, you sign a contract. That contract obligates you to a tour of duty. During your tour, you stand under military law.

That is simple enough for anyone to understand and everyone who has been there knows what I am talking about.

Would it surprise you all to learn, that having placed yourself under that law, you remain under that law until you remove yourself from it again?

It used to be that you were automatically presumed to return to your lawful status as an American once you leave the Service, but that is no longer the case.

You have to declare your political status as an American and willfully "return" home to your natural jurisdiction on the land and soil of this country in order to stand under the law of this country----- and regain your Constitutional rights and guarantees.

It's that simple.

The only way that the "Governor" of any Municipal "Commonwealth of Virginia" gets to mess with your guns, is if you are clueless and fail to declare your proper political status and allow him to "presume" that you are acting in the capacity of a "citizen of the United States", instead of as an American.

Just like in the Service, a commanding officer can tell his troops to disarm.

That is what this "Commonwealth" Governor in Virginia is doing. He is ordering all his Municipal "citizens" to disarm themselves. They have to do so, because they signed up. They have a contract to obey him.

You, on the other hand, can exercise your exemption and stand under the original Constitutional Law of this country, called the "substantive law".

So instead of giving the enemies of our country a chance to cause trouble, don't go to any pro-gun rights rally in Virginia or anywhere else--- exercise your exemption from gun-grabbing legislation directly and make it official.

There's no reason to fight over something that you already have --- your guaranteed right to keep and bear arms.

There's just a need to declare who you are and which law you are standing under.
