

For All Americans and All State Assemblies

By Anna Von Reitz

The first message I have for everyone is: Don't Wait.

It seems that many people in this country don't care if they have any protection under the Constitutions and are content to give up 80% of their earnings and accept literally "slave wages" and Noahide Laws as their lot in life --- until that reality comes home to them and they are faced with being homeless, taxed to death, imprisoned, and abused.

It also seems that a good many folks who don't like this prospect are nonetheless too scared and politically correct to do anything about it.

In either case, I have news for you --- time is of the essence.

Declare your political status and place your declaration on the public record to preserve it. Claim your birthright as an American and your God-given Natural and Unalienable Rights. Do so now before things get any worse.

Then, join and support and fully restore your State Assemblies. Work together with others of like-mind and determination to restore the fully functioning government of the people, by the people, and for the people.

Your lawful government has been badly eroded, but not fully overcome.

The second message I have for you all is: Waiting has costs.

Every day I get loads of messages, most of which I cannot answer, from individuals all over this country who are under attack by foreign privateers operating as "courts".

These are not our courts, and for the most part, they have no standing to address any American unless we are actual Federal Employees or Dependents thereof, or are engaged in the manufacture, sale or interstate transportation of alcohol, tobacco or firearms.

They do, however, have plenary control of both kinds of "US citizen".

So what happens is that they misidentify you as some species of "US citizen" and they haul you into their foreign court under this presumption, and you have absolutely no admissible evidence otherwise, no claim on the public record declaring your political status as an American.

This is how they subject you to their foreign statutes, codes, and regulations.

Once they have their hooks in YOUR NAME, you are stuck fighting a losing battle with well-organized privateers and your chances of winning against them are only about 4% on average.

This is because the foreign PERSON they named after you is already judged and declared guilty, so all they have to do is collect money and other assets, and decide how long they are going to profit themselves by keeping you in jail.

Sadly, many Americans are sitting around on their thumbs and not taking steps to protect themselves from these predators, and not educating themselves about these issues, either.

By the time they wake up and do their paperwork and educate themselves, they are already engaged in some kind of legal altercation with these fiends. Then, all of a sudden, they are ready to claim their political status as an American and finally join their State Assembly and they expect that this should be a Magic Bullet.

Your action claiming American political status AFTER the fact of being addressed by these courts has no effect and merely appears to be a self-interested ploy to escape punishment.

If you want to claim your EXEMPT status, you need to get your ducks in order and be prepared to defend yourself and your property interests BEFORE you are on the receiving end of these abuses. And you must understand what your political status is.

Unless you are a Federal Employee, you are an American State Citizen of The United States --- a Wisconsinite, a Texan, a Virginian, etc. This is a very different political status quite apart from being either a "United States Citizen" [Territorial] or "citizen of the United States" [Municipal].

To put an end to the predation of the foreign courts in your State of the Union requires you to join your State Assembly and organize your own courts and fill your own Jury Pools, elect your own Justices of the Peace, and elect your own Lawful Sheriffs.

Once you do, the provisions of Milligan Ex Parte kick in and the quasi-military Tribunals have to stand down and let your own civilian courts take over.

So stop whining. This is what has to be done to solve the problem. Get yourselves organized. Explain the situation to your friends and neighbors.

Put it to them straight --- do you want to claim your heritage as an American and have the protections of the Constitutions and the Public Law --or not?

If not, don't come running to us when you get in trouble.

It's up to all of us to stand up and act together to address these issues head on. We have provided the history and the knowledge and the means, but it is up to each of you and every State of the Union to take action.
