

For the Babies

For the Babies

I get numerous pleas from desperate new parents wishing to establish their claim to their own children. This is a measure of just how crazy and depraved things have gotten. You can't even assume your parental rights because these crazy out of control corporations are claiming to own you and your children as "products" of "licensed activity".

This is one way to challenge and stop it. Whenever any "State of _____" or "County of _____" organization offers to interfere with you or your family, you should immediately raise a "moral objection" to their presumptions and read them the riot act with a certified copy of a recorded (not registered) action such as the example below --- firmly in hand.

What these judges and so-called "public prosecutors" are doing in so-called Family Courts is nothing less than kidnapping for profit. Shut them down. Make sure new parents get this information and know how to use it. And remember to inform your clergymen that nobody in this country needs a "marriage license" --- only a proof of Marriage Covenant. Marriage licenses were created in the wake of the Civil War and imposed on former plantation slaves who had to prove they could support children before they were allowed to marry. This kind of subjugation was possible because they were considered "US citizens" and bound to do whatever the Congress told them to do.
