

Dear Friends of The Galactic Council

By Anna Von Reitz

No, we are not innately nor inherently self-destructive. We do not have a death wish for ourselves or other creatures. The actual Government of this country has not been at war since 1814.

We have been driven half-mad by the conditions imposed upon us by Galactic Criminals as you well know, for you are all responsible for allowing this to go on for the last 32,000 Earth Years.

For your amusement, for your experimentation, for your advantage in trade, for your beliefs, for your prejudices, and yes, for your fears, this planet and these people and all the animals have suffered and the Sons of the Saturnine Brotherhood have waged unrelenting, ruthless, piratical war against all sense and moral decency and reason.

They have trampled Universal Law and you have sat there and not lifted a finger; as a result, the fury of the Primal Creator has been engendered and is a flame already burning in the sky.

This time it won't be any gentle "Jesus" accepting the spite and mockery of these Accusers who stand accused by me and many others, as hypocrites, liars, murderers, and thieves who do not honor Creation nor understand the Creators.

The time has come for the Galactic Council to take a stand and stop waffling around. There is no excuse for prolonging any war of the spirit or tolerating any more ignorance about the nature of "time", the uselessness of lies, the correction of mathematics, the secret of physicality, and equally, no reason to listen to those portraying our race as hopeless and ripe for eternal judgement.

The ones worthy of eternal judgement are those who have accused us of doing what they have done, the ones who Breached the Public Trust, lied under Oath, lied by Omission, lied with purposeful malice aforethought, who murdered billions of people for profit, who spread the lies of money, who enforce a pathetic and False Doctrine of Scarcity and who will reliably cause more trouble if they are not stopped and held to account.
