

Gift Horses

How did we ever get in the situation most of us are in?

Our parents were tricked into signing undisclosed contracts disguised as government forms that appeared to be simple records about babies being born.

Wrong on two points. These undisclosed contracts were not being offered by our government. And they were not harmless records about babies being born.

They were vicious undisclosed commercial contracts.

We got you out of that trap, now you are being "offered" another undisclosed contract from "Swissindo". On the surface it appears to be "free money" --but instead, it is attached to "human obligation bonds".

These Swissindo creeps are here to make you an open-ended implied offer. They are offering you \$1200 a month but they aren't telling you what you are giving up or promising in return.

When you take their offer, they take your bond and subject you and your property assets to their debts and rules and never bother to tell you how many billions you surrendered "voluntarily" or what slave status you "willingly" accepted in "equitable exchange".

You are dealing with vicious international charlatans --slavers-- of the same kind that foisted "birth certificates" off on your clueless mothers.

Act accordingly. And complain to every politician in view. Take it to the consumer protection agencies. Demand a Congressional investigation. Sue the bastards to make full public disclosure of exactly what "Swissindo" is and who owns it and what their interests are and how is it that they are on our soil soliciting improper undisclosed contracts from gullible desperate Americans?
