

There Isn't "A" Republic. Period.

By Anna Von Reitz

There isn't "a" Republic and there never has been.

There is a Federation of fifty (50) State Republics.

Anyone who talks about "a" Republic is talking about a foreign, mostly French-sponsored commercial corporation.

And they are trying to deceive you, once again, into mistaking their commercial corporation for your lawful government.

Explain that there are fifty "republican states" and never a single "Republic". And if they won't listen and won't stop spreading garbage and deceit, denounce them as traitors, because that is what they are.
