More "Masonic Conspiracy" Bushwah

People never cease to amaze me with their capacity for missing essential information and facts that are literally "right before their eyes".

Here is a case in point: <https://stillnessinthestorm.com/2018/06/secrets-of-the-u-s-great-seal-the-royal-phoenix-rises-from-the-ashes/>

The Great Seal of the United States, as you can already clearly see, is always surrounded by what? A circle.

Why?

Because the Federal United States to which this seal refers operates under what?

Delegated Powers.

The circle announces to the world that the entity being represented is operating under delegated sovereignty.

So, the issue is not the design of The Great Seal of the United States, but the design of the actual sovereign seal, which is The Great Seal of the United States of America.

The Great Seal of the United States of America always appears without a circle around it.

Why?

Because it refers to the unrestricted and unlimited international powers granted by the States to The United States of America in 1776.

As I have explained before, the States had need of mutual combined representation in international affairs immediately after the Declaration.

Under international law at that time, they had to have a sovereign to sponsor and underwrite their operations in international jurisdiction.

They chose to operate The United States of America under the Coat of Arms of William Belcher, a Colonel in the Continental Army, who was already a "sovereign in his own right" in England as a result of the Norman Conquest.

If you look up the most common rendition of the Belcher Coat of Arms you will see for yourselves that it is the foundation of the Great Seal of The United States of America, and if you look up the actual Great Seal of the United States you will see that it is simply an enclosed/encircled version of the same design.

All the discussions and artistic efforts and druthers and designs of the Freemasons in Congress, and whether or not they wanted a phoenix represented or an eagle, is all consigned to the dust bin of other Congressional designs in general.

The actual symbol on the both Great Seals is undeniably and actually an American Bald Eagle, and that, too, is apparent to anyone who cares to open up their eyes and look -- instead of indulging themselves in ugly and convoluted fantasies and questionable "supposes" about the motivations, intentions, and desires of men who have been dead for over two centuries.

The facts and the Seals --- both of them --- speak for themselves.

It was ultimately decided that the "Federal United States" had to conform to the source of its "Delegated Power" --- The United States of America, so both Great Seals are identical, except that one is enclosed by a circle, and the other is not.
