

## Modus Operandi 8.0

By Anna Von Reitz

In summation to this point -- a wide variety of means are employed to promote the criminality in our midst. Those means involve making False Claims and Accusations, role playing by Actors to confuse identities and discredit whole groups of people, the incorporation of business interests and individuals as mere franchises in a larger corporate web all tied to the unincorporated government of the Holy See---which in the case of governmental corporations is promoted under force and color of law, and finally, the creation of Special Interest Groups and Secret Societies to promote self-interested privilege, elitism, and material advantage for members, often using these groups--- knowingly or unknowingly-- to organize and enforce criminal activities.

Let's work backwards now and see how this operates in reverse -- going from one particular Special Interest Group, through the incorporation process, back to the Actors, and finally to the False Claims underlying it all. We will demonstrate that this is indeed a Kingdom built on lies.

The Special Interest Group most responsible for creating and maintaining the criminal corporate government system can be generally described as Public Employees. The explosive increase of criminality promoted by the civilian Public Employees started shortly after they were allowed to form Public Employee Unions---- a political lobby of government workers.

So, once again, the delivery system for all this criminality is organized via a lobby. Take special note. All these Special Interest Groups -- secret fraternal organizations, Bar Associations, labor unions, political parties, and labor unions -- can all be described as lobbyist organizations, or in British parlance, as guilds. All of them.

These groups, often possessing specialized skills or knowledge, and the commercial corporations they work for, both governmental and non-governmental, are the core delivery system for the institutionalized crime we are dealing with.

While the impetus and motivation for crime may begin with the self-interest of a relatively few individuals or a small group within the framework of the whole, for an example, the State of Ohio Legislature passing a Driver License Statute to pay for road improvements and pay patrolmen and "promote public safety" back in 1923 --- if there is a profit to be made, the profit motive spreads the crime throughout the entire system like wildfire.

The State of Ohio, Inc. made a profit on licensing Drivers of Motor Vehicles, and soon every Territorial State of State organization in the country was doing the same. Technically, this was "legal" because the legislation affected only State of Ohio employees and dependents and affected only "Motor Vehicles".

Remember that we are dealing here with commercial corporations in the business of providing government services --- not actual governments. As commercial corporations they are motivated by profit, not the Public Good. As commercial corporations, they can demand that their employees wear uniforms, obey private corporate laws called "statutes", and adhere to other requirements as a condition of their employment----including licensing requirements.

So: (1) the State of Ohio, Inc., as a commercial corporation, requires its employees and dependents to register their private cars and trucks as "Motor Vehicles" and requires them to obtain "Driver Licenses" as a condition of their employment. (2) State of Ohio, Inc. made money by doing this. (3)

Motivated by profit, all the Territorial State of State franchises were soon doing the same, and (4) by a process of assumption and non-disclosure, they gradually imposed their private corporate Public Policy upon the General Public under color of law.

The Public Employees become complicit in this process because more money for the corporation employing them means more money, more power, more benefits, and more jobs for them.

The key realization for all concerned is that these things operating "as" our government at both the Federal and State levels are all for-profit commercial corporations, and not true governments at all.

Everyone in this whole system from the Holy See -- the final receiver and beneficiary of this system, to the State of Ohio Legislature, to the State of Ohio Court System, to the Public Employee Unions, to the lowliest junior traffic cop or officer worker at the now-privatized Division of Motor Vehicles (DMV) -- is corrupted by the same private profit motive.

They are in direct conflict of interest with the Public Good and all working together as a network -- an organized crime syndicate -- to profit themselves.

Do they do some good by enforcing Driver Education and Performance standards? Yes. Do they do some evil by enforcing their Public Policies as "law" and charging members of the General Public to pay and obey? Yes.

They are engaged in open racketeering and acting in violation of our Natural and Unalienable Right to travel.

Very little has changed since the days when Robber Barons sent out groups of armed men to waylay travelers in mountain passes and charge them tolls for the use of the road.

And who is going to enforce the actual Public Law against them? Who is going to provide a Court to bring them to justice?

Certainly not the same corporate police and corporate court officials who are profiting from all this graft and misrepresentation and greed.

The military? The military is looking to the same criminal corporations to make the profits to keep them fed.

There are only two answers: (1) expose and embarrass them from the Pope on down, so that the sheer force of public awareness and public outrage bears them down and forces reform; (2) seize upon our natural birthright political status as Free People and boot up our lawful system of self-governance, including our Public Courts and Sheriffs and Marshals.

Okay, so we have tracked our example back to the level of the Public Employees who are creating and enforcing this criminality. We have exposed their motives, and their costumes as Actors are plain enough to see: police uniforms and judges robes. There is only one more step to go.

We have to examine the Lies at the bottom of all of it.

In our example, the underlying Lies are the "Offer and Demand" by the State of Ohio to do two things: (1) falsely register your private car or truck as a "Motor Vehicle", and (2) falsely register yourself as a Person subject to their private corporation and its internal rules and regulations.

Their organization is basically requiring you to lie about yourself and your own private property and they are doing this under color of law and armed force. If you don't do what they want, when they want, how they want, at the price they demand, they will roam around in armed bands and molest you on the highways of this country like Highwaymen of old.

These Legislators and Judges and Police Officers and Commissioners and Governors and other Public Employees acting in support of this and similar racketeering schemes are betraying the Public Trust for money and political power---- for commercial corporation profit, not the Public Good.

As commercial corporation employees they are in fact no different in kind or authority than the Board Members and Employees of Burger King, International. The only difference is that these Public

Employees are in the business of providing government services instead of flipping burgers, and they are grossly usurping upon their employers in violation of their employment contracts.

They are using armed force under color of law to coerce compliance with their lies and their demands.

They are by definition engaged in extortionate racketeering and inland piracy.

And nobody --- not the Pope, not the Queen, not the Lord Mayor, not the Parliament, not the Congress, not the Judges, not the Legislators, not the Public Employee Unions, not the Public Employees themselves --- nobody, no group within their entire chain of command, is doing anything sufficient to self-correct.

Instead, what we see is that when someone like Donald Trump tries to make corrections and bring the corporate operations back in line with actual Public Law and the actual commercial contracts that these corporations are supposed to honor and fulfill-- we have the members of the runaway Congress and the corrupt Judiciary bucking like wild horses against the saddle.

History has proven that corruption of this kind just breeds more corruption, and that unless this process is stopped, it simply gets worse until the people rise up and start murdering public employees and anyone else who can be identified as any kind of official. In Cambodia and China and Vietnam and during the French Revolution, the purging of corrupt "government" officials got down to the level of school teachers and public notaries.

The commercial corporations employing and mis-directing all these people were destroyed, along with vast amounts of valuable property and infrastructure.

To prevent this from happening again with increasing violence on both sides, a number of things have to happen.

Public Employees need to remember who they actually work for.

The American People have to wake up and undertake the duty to self-govern and provide the governmental structure and Public Courts that will in turn counteract the corruption and crimes of the commercial service corporations.

The President and the military and the Secretary of State and the Secretary of the Treasury need to fully support the peaceful efforts of the People to correct this mess, and need to respect our actual political status and standing regardless of the coerced, non-disclosed, and falsified public documents, birth certificates, licenses, and registrations that have been employed as a means of identity theft and constructive fraud against the American People.

The Pope needs to do far more to correct operations and liquidate corporations engaged in criminal activities. He also needs to deny corporate privileges to those who have engaged in such crimes in the past, not foster a revolving door syndrome in which the same sins are engaged in by the same people simply from a new location or under a slightly different name or charter.

So does the Queen need to get off her velvet tuffet to actually honor the contracts held by her government and to stop British commercial corporations from usurping against our government, stop press-ganging our people, stop trespassing on our jurisdiction.

Every member of Parliament and Congress and all the "state of state" legislatures and the Public Employees in general need to wake up, too--- and stop their criminal trespasses against the American States and People.
