

Moms of America

By Anna Von Reitz

When my Mother (born 1920) discovered what the Vermin had alleged against my sister and I and our children as a result of her signature on the hospital records, she wrote a scathing rebuttal and explained the source of the "misunderstanding" -- the failure of the perpetrators to fairly and fully disclose which "United States" they were talking about.

She filed her Testimony on the land jurisdiction record and revoked her signature and her purported election to have herself or anyone in her family "considered to be" a federal citizen of any kind. Thus when the U.S. Attorney General comes to me and pretends that my Mother "gifted" me to their corporation, the opposite set of facts and counter-claim is already part of the international land jurisdiction record.

And he can go blow.

I shall never forget the look on my Mother's face when she understood what these Vermin have done. It was a look of sheer outrage, and I have felt it myself, because the same extortion and the same repugnant demands were made upon me by hospital personnel when my son was born.

I repudiated them on the public record, too, and gave full testimony of how a huge male nurse and two female accomplices came to my hospital room which I paid for--- and demanded that I complete their paperwork, or they would seize my son and never let him come home from the hospital.

This is what is going on in America. Unfortunately, it's going on all over the world. A giant crime syndicate has built this "system" and administered it via an interlocking trust directorate.

They are stealing our babies and using them as slaves and as chattel backing their corporate debts. If you can think of anything more repugnant, more un-American, more inhumane, more evil or more false --- let me know.

Now, all you women, all you Mothers out there --- the U.S. Attorney General is holding your babies to this unconscionable "contract" based on your signature. They, the Vermin, are claiming that you "willfully" and "voluntarily" donated your children as gifts to their corporation. Just like they are claiming that your Mother's donated you.

Is that true?

Are you mad?

You ought to be.

This evil system has been clicking along for decades, like a lawn mower, cutting the living people down to mere corporate franchises. Their corporation has been racking up debts against you and your children purportedly with your "voluntary" and knowing consent.

Is that true?

Are you mad?

You ought to be.

Who owns your children? You, or the foreign government service providers?

Your children are being stolen by racketeers and as, in my case, by extortionists, threatening actual physical kidnap.

Your children are being sold into debt slavery and your rightful ownership of your minor children is being by-passed to the State of Whatever. Even your marriage is being "interpreted" as a "licensed" Joint Venture, with the State of Whatever playing an undisclosed Third Party role with an interest in the "products" of your JV -- your children.

The men and women who are supporting this unconscionable theft and this whole system of enslavement are lower than snakes bellies in deep, deep wagon ruts, and they need to be stopped. Permanently.

So what are we going to do about it, Moms of America?

Are you content to have your children stolen and sold into debt slavery to benefit foreign corporations? How about having yourselves identified as "Unwed Mothers" who are "voluntarily" donating your kids as "wards of the State of State" and delivering them to the U.S. Attorney General as "Alien Property"?

Isn't it more than past time for all this CRAP to end?

So let's begin with the U.S. Attorney General, who is an Officer of Interpol, not an American at all, and not even a "U.S. Citizen" anymore.

Let's ask him what in the %1\$!#%^@ he thinks he is doing seizing upon our children via false commercial claims solicited under color of law?

He's got a lot more to think about and answer for than any Russia Investigation. And so does Donald J. Trump.

We can address the long-running international fraud and we can reclaim our assets from the Philippines and elsewhere and we can settle all and any lawful debts that are owed by anyone on Earth, but in order to do that, the political lobbyists occupying Capitol Hill and other "administrative agencies" like the DOJ, FBI, DOD, IRS, et alia, have to be brought to heel.

And that's where you come through the door, Moms of America.

This is where you grab those political lobbyists by the crotch in your Mama Bear jaws. This is where you nail the "U.S. Attorney General" and all his stinking little minions to the wall. This is where you tear up and return all the licenses. This is where you pigeon-hole the local country and State of State vermin and tell them: (1) what is going on and (2) where to get off.
