

A Note For General Kelly

From Anna Von Reitz

Dear General Kelly,

We know where your heart is. We know that your sense of duty and justice is strong and that all you ever truly wanted was to see justice for America and her veterans.

As our research has confirmed, America belongs to her veterans, her militia, and always has. Any attempt to cheat the American Armed Forces by changing a name or other legalistic mumbo-jumbo is already moot. The truth is the truth, and when the truth comes, what is false must pass away.

So, be comforted and be at rest concerning the destiny of our military and our veterans. They won't be blamed or cheated or lied to anymore.

The stock portfolios will be cashed out and made available to the vets and their families at their discretion. The retirement accounts that are realistically owed to everyone will all be made good.

And "miracles" of new services and programs will be made available to vets and their families. If you could see what I have seen, what we have planned for our military in the future, and our retired veterans--- you would weep for joy.

Lift up your head, out of all the confusions and smoke-and-mirrors. There is an actual, factual America. There is a sovereign nation. And at the end of the day, when you least expected it, The United States of America, Unincorporated, is here for you and all those who have served our actual country so long and faithfully.

Thank you.
