

OMG

By Anna Von Reitz

Just in.

In 2008, Dr. Anthony Fauci co-authored a paper about the Spanish Flu Epidemic that rates as the most devastating modern pandemic. It swept the entire planet in the wake of the First World War and caused millions of deaths.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2599911/>

So in studying this major and actual pandemic, what did Dr. Fauci and his colleagues find?

They discovered that most of the victims of the Spanish Flu didn't die from the Spanish Flu. They died from bacterial pneumonia. And the bacterial pneumonia was caused by... wait for it, wait for it... wearing masks.

The intention then, as now, was to halt the spread of the disease by wearing masks, but what actually happened was that an "unobserved" pandemic of bacterial pneumonia was unwittingly created instead.

And Dr. Anthony Fauci knows this, because he wrote about it in 2008.

Think about that the next time you see an overflowing garbage container filled with used masks --- or find a used mask jammed into your grocery cart or just lying like a dirty diaper in the middle of a parking lot.

A huge public health hazard and the threat of a non-viral pandemic of bacterial pneumonia is being fostered by the use of masks and Dr. Anthony Fauci knows it.

He has known that since at least 2008.

And yet, he sits there mum as a stump.

Ever heard of negligent homicide?

We need to put an end to this situation and an end to any authority vested in those private individuals promoting it. Now.
