

A One Page Reduction of the Situation

By Anna Von Reitz

These private corporate tribunals are only "giving an appearance of justice" ---- which the courts boldly state in their own published rules---- and you can believe them or not, based on your own experience.

Governmental Services Corporation Operational Code	Dates of Operation	
United States of America, Inc. Federal Code Titles 1-50	1868 - 1999	
(under bankruptcy administration)	1933 - 1999	
UNITED STATES, INC. Title 50	1944 - 2015	
THE UNITED STATES OF AMERICA Nations Law	2009 -	United
USA INC. Puerto Rican Law	1944 -	

Your political status determines your "law" and your "persona" so long as that corporation exists and you are "enfranchised" by it. .

United States of America Person ---- "John Mark Doe" a foreign situs trust-----
subject to Federal Code

UNITED STATES PERSON ----- "JOHN MARK DOE" a Roman Civil trust -----
subject to Title 50

THE UNITED STATES OF AMERICA/USA ----- "JOHN M. DOE" a public transmitting
utility-- subject to United Nations Law and/or Puerto Rican law.

Obviously, nobody is enfranchised by the United States of America, Inc. anymore
and the old Federal Code is out the window. Obviously, too, since the UNITED

STATES is insolvent and under liquidation since 2015, Title 50 is gone, too, and anyone operating as "JOHN MARK DOE" is fair game for international creditors.

What remains on the board is THE UNITED STATES OF AMERICA, INC. and USA, INC. ---- and people can choose to be "enfranchised" by both of these entities and be subject to both UN law and Puerto Rican law---- or they can wake the hell up and reclaim their birthright status and live as free men under the United States Statutes-at-Large and not be "enfranchised" at all.

You have a CHOICE. You can live as a free man or as a corporate franchise operator.
What's it going to be?

You can live under the Law of the Land --- the Ten Commandments, the lawful Constitution, the United States Statutes-at-Large or not. What's it going to be?

You can live under the Law of the Sea --- either as workers employed by the United Nations Corporation or as chattel collateral standing good for the debts of an already bankrupt Puerto Rican Electric Company.

Your call.

What's it going to be?
