

## Our Address For The Queen

From Anna Von Reitz

While it is wonderfully apparent that our lawful government has suffered Gross Breach of Trust at the hands of several generations of British Monarchs, ruthless mis-representation and mis-characterization, and deliberate theft and violation of international treaties and commercial contracts owed to us, the Queen of Great Britain must be notified and given all assistance and means to make correction--- therefore our unstintingly polite correspondence:

Her Majesty The Queen June the Sixth of 2018 A.D.

Buckingham Palace

London SW1A 1AA

Your Majesty:

It has come to our attention that you have apparently lost our address and are therefore unable to correspond with our Sovereign and Unincorporated Government, The United States of America. We find it necessary in view of current affairs to remind you that our address has not changed in over 200 years and that our mail may still be received by sending to:

The United States of America

General Delivery

316 Market Street

Philadelphia, Pennsylvania

[19106] The United States of America

Or more securely and directly to:

The United States of America

c/o Clinton Belcher

2848 South Sheridan Street

Philadelphia, Pennsylvania

[19148] The United States of America

No doubt this lapse in communication has resulted in the current circumstance in which we have not been informed of the "abeyance" of the Federal United States organization and the substitution of the Territorial United States as a Trustee and Secondary Beneficiary. No doubt, too, this has occasioned the failure to Notify us of the numerous

bankruptcies of Territorial and Municipal United States corporations charged with providing our States and People with “essential government services”.

Any presumption on the part of Your Majesty or of Your Government or of the Government of Westminster that we “no longer exist” or that we have been “de-populated” or that we are inhabited by “disregarded entities” or that we no longer maintain our Post Office and our addresses in Philadelphia would indeed be a false presumption owing immediate correction. As we have informed the United Nations Secretary-General and the Vatican Chancery Court, we are alive and well and our Hereditary Head of State is similarly well-disposed, in full life, and enabled to competently administer our affairs---as we have been from September 9, 1776 to date.

Indeed, our earlier correspondences with Your Majesty would indicate that we have shared our closer regional office address with Your Majesty and invited Your Majesty to honor our reversionary trust interest in all soil and land assets naturally belonging to our States and People, despite the incapacity of our original federal subcontractors doing business as the States of America.

Here again for your reference and convenience:

James Clinton Belcher, Head of State  
The United States of America  
c/o Box 520994  
Big Lake, Alaska [99652]  
Non-domestic - The United States of America

As our Estates have been subjected to probate in error and in apparent Breach of Trust, we request corrective action by Your Majesty, and note that by Operation of Law, all Delegated Powers have now returned to The United States of America owing to the incapacity of the Federal United States being held in abeyance, and the bankruptcies of both the Territorial and Municipal United States.

This circumstance, as unfortunate as it is, does occasion a form of emergency but conveys no granted emergency powers; pending return of our assets, including the misappropriated “Life Force Value Annuities” owed to six generations of Americans, we shall be continuing to work with Mr. Trump’s Administration to restore and rebuild our First Estate, to convene a Continental Congress to resolve unfinished business, and to resume exercise of our formerly delegated powers.

Yours truly,

Anna Maria Riezinger, Fiduciary
