

Answer Regarding Confusion

By Anna Von Reitz

In answer to the confusion over the apparent layers of "government" it is easiest to visualize in terms of jurisdictions instead of "territories"----which can mean many things.

The federal corporation(s) received a delegation of our authority to provide certain (19) services to our states of the Union and they have usurped their delegated jurisdiction over on top of ours in contravention of our agreements with them and they have claimed falsely that we knew about this and agreed to it.

Each state of the Union is also a nation (national = land jurisdiction = public) and a state (international = sea jurisdiction = private) as well as having its part of the global jurisdiction of the air.

So, for example the state of new york has air, land, and sea jurisdictions associated with it.

Under the Constitution agreement our states retained ALL jurisdiction on the land, retained some of their international jurisdiction on the sea, and delegated some to the "federal government" which is in fact a British-controlled corporation in the business of providing governmental services.

Congress has meddled and futzed around with this foreign corporate entity in various ways to create multiple corporations doing various things within the District of Columbia, such as making the city of Washington a separate international city-state with its own separate municipal government and running it as an oligarchy.

All that makes it more confusing from the federal side, but from our side it is a simple "us"--- the Americans and American states and "them"--- the federal corporations operating out of the District of Columbia.

Please note that all the land jurisdiction is ours and that our counties and states are described as land parcels with physical borders. These are the actual counties and states which are owed their own county and state governments.

But back in the 1950's and 60's "thanks" largely to finagling by J.D. Rockefeller, the then-State and County organizations were seduced into agreeing to incorporate as franchises of the federal parent corporation in order to receive their "fair share" of federal racketeering kick-backs, euphemistically called "Federal Block Grants". When

they did this, they came under the more or less direct control of the federal corporation and the Checks and Balances that are supposed to be built into our government system were destroyed. The foreign British-controlled federal corporation now had de facto control of our government and had basically purchased its position by illegally pillaging and plundering the American people and then bribing and buying off the state and county organizations by giving them a share of the profits.

When those then-operating organizations incorporated under the auspices of the "federal government" corporation, they started operating in its sphere--- that is, in private international jurisdiction--- and our public state and county governments were "vacated". It doesn't mean that they were destroyed or ceased to exist, simply that the people we elected and trusted to represent us went to work for different masters without telling us.

The result is that our lawful government on the land was deserted and nobody was any longer directly responsible for enforcing the organic and public law of this country. All the then- Sheriffs went from being peacekeepers (enforcing the law of the land) to being law enforcement officials (responsible for enforcing corporate codes, regulations, and statutes).

The heart of this conundrum was addressed by Sheriff Richard Mack in Mack and Prinz v. USA, in which the Supreme Court decided that an elected county sheriff under this new system COULD at his own volition (and according to his own judgment, not as a job duty) CHOOSE to enforce the Constitution. But obviously, a sheriff who enforced the limits of the Constitution against the federal corporation was not likely to remain a "sheriff" in this system for long, wouldn't get corporate bonuses, etc., so fewer and fewer of these men chose to do their public duty even though Sheriff Mack cleared the way and made it "official" that they could do so.

Over time as people have become more ignorant and more inured to these abuses, the acceptance of federal supremacy in areas that are not rightfully delegated to the federal government has grown until we have been living with ever-increasing racketeering by this foreign corporation.

Obummercare is a good example. The federal corporation moved to take over the entire Health Industry sector of our economy worth hundreds of billions of dollars annually and because people ignorantly assumed that this "thing" headquartered in DC had authority to do this, the rats used our ignorance to their advantage.

Because they bought off our legitimate state and county governments decades ago, they were unopposed. They could do virtually anything they wanted to do with the resources of this country and to the people of this country, because their fraud and deceit had been accomplished without the People knowing.

And then, we began waking up.....we realized that what was posing as our country government wasn't acting as our county government, and the same with the state governments. They didn't answer to the people anymore, they answered to the "federal government"---- to the District of Columbia Municipal Corporation, to be exact, and to the UNITED STATES, INC., and so on.

Foreign investors were coming in and buying up whatever parts and pieces of our "government" that they wished to buy and running things however they pleased as

privatized subcontractors. The Federal Reserve Banks literally bought the entire court system and used it to collect whatever phony debts the banks and politicians cared to foist off on people.

And the rats in Washington, DC-- the members of Congress and the various "Presidents" --sat on their rumps and let this go on and profited from it for six (6) generations while singing "Yankee Doodle Dandy".

So now the UNITED STATES, INC. fronted by the French-sponsored International Monetary Fund is being liquidated by the GCR Committee, which also recently took over the Vatican Bank, and heads are rolling in DC, but this is just another changing of management over the federal corporation(s).

We are the actual Priority Creditors of all the federal, state, county, city, and other corporate entities involved in this fiasco.

And we are also the actual beneficiaries and comptrollers responsible for the land jurisdiction of this country and its rightful government.

So that is why our actual legitimate unincorporated Jural Assemblies are meeting in every state and being set up in every county and that is also why American Common Law Courts ---- not Martial Common Law Courts---- are being restored across the nation. That's why nine million Americans have stepped forward to serve as Continental Marshals --- what used to be called "Federal Marshals"--- to enforce the public and organic law of this nation.

The Great Fraud that began in 1860 is at an end. And all I can say to all of you is: (1) step up and grab an oar, declare and record the fact that you don't choose to be a "United States Citizen" nor act as a "citizen of the United States" and that you instead claim your birthright as an American State National; (2) get busy setting up your own county Jural Assemblies, electing your own Public Sheriff to enforce the Constitution and the Public Law of the Land, elect your own judges, court clerks, and set up your jury pools; (3) give notice to those who have been impersonating your lawful public officials while in fact occupying private corporate offices instead--- let them know that they don't represent you and that they are not agents of any American government and have no local authority; (4) spread the word and let it be heard around the world.

The "United States" is not America and it never has been.

The various foreign corporate entities ensconced in the District of Columbia were supposed to be providing nineteen well-defined governmental services under contract --- nothing more or less --- but over time, they usurped against their employers and established a lawless and pernicious and parasitic corporate counter-culture devoted to nothing beyond their own enrichment at any cost.

Now they are being de-funded and the odious debts they racked up against the American People are being repudiated and many changes are being made to clean up the operations and replace the management of these venal organizations---- but it remains to you, the actual American People, to get up on your hind legs and do the job of "self-governance" and to learn your own history as a nation and to defend your nation against such fraud and usurpation.

Even the Great Sacred Cow, the actual Constitution, must be addressed and addressed intelligently in days to come. The Constitution made sense when it was adopted 227 years ago, but it allowed Britain to control American currency, American investment, American Trade Policy, and American Foreign Policy---- in exchange for Britain to act as our Trustee in these matters and to protect our "shipping"--- our "commerce"--- in the international jurisdiction of the sea.

Britain betrayed our trust and sought to mischaracterize us as its own employees and subjects instead of honoring our birthright identity as Americans and these false Trustees then additionally acted as Executors de Son Torte to pillage and plunder and attack our innocent and unsuspecting people through the agency of the "American Bar Association" and its members. Thus, they did not honor their part of the Constitutional Agreement and are owed no consideration from us. In fact, we are owed damages that Britain can never repay or repair.

Since 1946, the French Government has also gotten into the act and interfered with our lawful government and undermined our traditions and practiced self-interested fraud against us.

The time has come for us to act with very clear-eyed vision and purpose. There is no reason that we should be delegating any of our authority or any part of our responsibility to any foreign entity or corporation whatsoever. We are fully competent and able to provide all of our own governmental services and have been so enabled for at least 175 years. The Constitution as we have known it must ultimately and intelligently be dismantled and a new basis for our self-government must be established so that Americans have control of all jurisdictions, air, land, and sea, related to us and our country.

This will not be an easy or instant process, but it is one that must be recognized and engaged in honestly and wisely.

Those of us who have observed these evils and studied the history must teach others and each of the men and women who now step forward to act in favor of their local counties and states must do so with no thought of their own self-interest. They must act as Fiduciary Deputies, fully accountable for all their actions and inactions.

Only by accepting the responsibility of self-governance can we earn the peace and the prosperity we are heir to.
