

Reply for Tony --- Unanswered Letters 16 -- No, Not Like Karen Hudes in Any Respect

By Anna Von Reitz

On Thu, May 26, 2016 at 7:06 PM, Tony wrote:

Dear Mr Stramer,
I have read a letter (linked to your site) concerning a debt transmittal letter as written by Anna Von Reitz.

Near the end, she writes "I am also.....authorizing the transfer of credit from our trust accounts to cover all debts of UNITED STATES, INC. This...."

I have tried to listen to her debates with Karen Hudes with much frustration. It seems both women want the same thing but each wants to be the boss who lets the world banking cartel off the hooks free and clear. Neither will concede it is not their money to give to anybody. However, both seem to be the self-appointed spokespersons for their cause.

Years ago, I first read the words re-told recently on a video about a story concerning Davy Crockett giving some money away that was not his to give (and he did it without permission & on his own accord). It seems that both these women need to sit side-by-side and mutually work out their ego differences and Get 'er done! A thought crosses my mind wondering who died and left them in charge. It sure was not Davy Crockett or he would have left notes on how not to spend other people's money.

I have been actively involved in this same movement since 1999. Never spent a penny of someone else's money without their consent and encouragement. Yes, I am a free man and do not need a woman to tell me so, but am willing to listen to thoughtful suggestions -- never edicts.

No need for name calling. No need for fights. State your rightful claim. Stand your ground.

Sincerely,
Tony

And here is Anna's answer:

If Tony had bothered to read and use his head instead of his mouth, he would have seen the next sentence, requiring them to put the arbitration process in motion which will allow us to unload all odious debt for things we didn't order and didn't benefit from.

What Tony and many others don't quite grasp is that in a debt-credit system a credit is created at the same time as any debt, so if there is a "National Debt" there is also already an answering "National Credit". The IMF dba UNITED STATES, INC. didn't pay its creditors and used us as the excuse. They said we hadn't paid our bills and settled our accounts---that is, we hadn't done our part and applied our National Credit to the National Debt so as to bring the account balances back to zero. The excuse for this is that nobody having the right political status to order the accounting correction had authorized it.

So I did.

If I hadn't, it would have been used as an excuse to claim that we are NOT the Priority Creditors of the UNITED STATES, INC. and that we are merely the sureties for their debts, and that would have allowed Secondary Creditors like the IMF and the FEDERAL RESERVE and the GOVERNMENT OF FRANCE to come in here and start mass evictions and police actions and seizures of our land, homes, and businesses.

Any idea that I "let them off the hook" is a completely backward misreading of what actually happened. I forced them to correct an "accounting error" that would have provided them an excuse for using all the commercial mercenary organizations that they have in place on our soil operating under color of law.

If Tony would rather see mass starvation, murder, crematoriums, internment camps, and the destruction of the American people --- who are in fact the Priority Creditors of these rats---- for lack of accounting savvy, let him be the first to go to a FEMA Camp.

My actions forestalled that outcome and at the same time held the appropriate feet to the fire for all the odious debt they charged off against our accounts.

And no, I do not want the same thing as Karen Hudes. Karen Hudes wants immunity for her Bosses and she wants profit for their banks at our expense. I have had quite enough of both. I believe that criminals who defraud innocent people should go to jail. And I believe that the accounting should be made right.

These banks know what they've done, and they are scared. So do various governments feel the need to hide their faces. Coming out of World War II they had to borrow huge amounts of money and resources and credit from the Americans. This is a fact that everyone knows. But the amount plus interest due back to us is insurmountable. It would have crushed the European and Commonwealth and Japanese economies for generations. So they hit upon the fraud scheme as a means to "off load" their own debt onto us. It almost succeeded.

The plain fact of the matter is that Americans are filthy rich, yet have lived as drudges and slaves working for these European crooks for the past six generations and serving as cannon fodder in their wars for profit.

Neither I nor anyone I know favors a Nazi-style "killing of the creditors" as an answer to this ridiculous situation and nobody cares about imaginary debts and imaginary money, either. We must all come to realize that we have been utterly snookered by the bankers who could care less if we trade in gold, paper, or wampum beads, so long as they can control the production and supply of whatever it is we are using as "money".

In this case, what the rest of the world owes us is nothing more than digits on a ledger and we certainly don't owe anything at all. We can't--- why? Because every debt in a debt-credit system creates an equal and answering credit. They held the debt side of the ledger and we held the positive side of the ledger, so all that "controversy" was nothing but a political device aimed at excusing acts of criminal violence against the innocent American People and seizure of our property under conditions of deceit and color of law.

We are the Priority Creditors of every nation on this planet except for Russia and China, North Korea, and a very small handful of other smaller countries. They owe us more than they can pay us back. So the first step is to balance the National Debt against the National Credit and get rid of that Red Herring created by fraud and dishonest accounting. And the next is to look at the actual accounting.

When we do, it will be clear that instead of being trillions of dollars in debt, we are trillions upon trillions of dollars in the black, and in a position to: (1) end the corrupt banking system once and for all; (2) make sure that everyone on this planet has a chance to live a decent life; (3) bring forward the suppressed technologies that can save us and our planet.

So, Tony, what do you want? World War III and a Nazi-style purging of America? Or the settlement of debts that are petty in comparison with our credits and the chance for the whole world to make a new start?
