

Successful Outcomes

Purpose:

Empower every assembly with the resources supporting successful outcomes when reconstructing Americas original government. Assemblies are driven and structured by committees.

Mission:

We start with the end in mind - Sustaining the essentials of all American Nationals. We provide forward guidance, assistance, and financial asset protection and retention to all American State Nationals.

We assist with information delivery objectives including planning, implementation and promotion.

Our efforts support our Assemblies Mission Statement.

Vision

Reconstruction of the original republican form of government owed to all States. A government focused on securing the rights, labor and property of all **States**. --- Not "States" --- people! Our focus is first and always on the people, only secondarily on the States.

Leading by example and as a beacon of light – leading the union of all **confederate** states. – Not "confederate" states, that is, states-of-states and a union of those confederate states – all of which don't exist and won't exist until the work of reconstruction is done. All that exists now is the Union of our States at the National level and the Federation of our States at the International level. I am using the English language convention instead of the Latin convention with regard to the word "states" because (1) we are talking about the same States and same people operating in two jurisdictions, not two separate groups and (2) English is our official language. The use of "state" to express our National Jurisdiction and "State" to express our International Jurisdiction is foreign and based on Latin. The use of that style convention to separately denote "national" and "international" was adopted by the Municipal Government and has nothing to do with us. Using "state" to denote our Union nation-states and "State" to denote our Federation States makes it look like we are two separate groups and opens up an opportunity for divisiveness; it also makes it look like we are ignorant or adopting their government and their language conventions and not our own. If we are all going to stay on track more people need to become conversant with English Grammar, especially as it pertains to names.

Review

1. Progress on deliverables from past meeting

2. Global International Trade Bank's purpose, mission & vision with The State assemblies for alignment and conflicts – We already have our own International Trade Banks chartered. The first one to launch happens to be

The Global Family International Trade Bank which we are using as an incubator for all the others. The Global Family International Trade Bank is our bank, not some separate “vendor” belonging to or operating under foreign powers. There will be numerous other banks, all established as Public Vendors, not Private Vendors. The second bank to be fully developed will be The American States and Nations Bank and ASAN Commercial Bank – the first two bilateral banks belonging to a single country.

3. What needs to happen to bring the banking process back on schedule and everyone on the same page

Our banking process has never been “off track” as implied here. What happened with the PMA Credit Union had nothing whatsoever to do with our bank and aside from being an additional lot of unforeseen work for Hunter, didn’t impact us. So, thank you very much, our bank process is right on track and on time. What set us back was all the nastiness that led to the closure of the LRS and the necessity of rebuilding a competent international recording system to replace it. That cost us about six months, but as we had to do that, we went back to the drawing board completely and revamped and improved everything in the process. We have now more than caught up.

Global is a vendor to provide a service just like any service provider for governmental services or any other outsourcing contractor. It was not the only game in town, but it was the one chosen to perform this service. That is why terms of service are set to identify what and how the service functions within the parameters of the treaty. Participating in other Global services is a private family affair. This is simply **NOT** true. Global Family International Trade Bank and its commercial auxiliary are both chartered under our Law and are **Public** Vendors operating within our **international land jurisdiction** and our **global air jurisdiction**, respectively. It is the first of many other bilateral banks to come, including The American States and Nations Bank/ASAN. There is no limit to how many bilateral banks can be organized here and throughout the world and no reason to think (or tell other people) that the Global Family Banks are private and singular vendors hired to do a job by the Federation. That’s not how public charters work.

3 different organizational structures, so we keep them separate. Again there are wrong-headed assumptions at play here. Land and soil are two different jurisdictions. International banks (land, in this case) and National banks (soil) are different beasts entirely, though they must have a compatible interface and be able to work with each other.

Because our States are also Nations, there can be a bit of confusion because this results in a situation where our State Banks are also “National” Banks, however, the word “National” can be applied to any “Nation” not just us. It can reference the “Nation” of British Territorial U.S. Citizens, so they readily refer to their “National Security” --- not ours. They also call their incorporated State-of-State Banks “National Banks”. It’s another semantic deceit conundrum, which is why I prefer to call State Banks what they are: State Banks.

The current banking system is working in the international jurisdiction of the **sea, not** the international jurisdiction of the **land**. All its commercial work is being done in **maritime** jurisdiction, not **air**. When we talk about a new banking system, we means totally new --- new jurisdiction, new law, new everything. We are not talking about forming more sea/maritime banks. We are forming land/air banks instead.

We have taught you all that we live on land and soil, and as a result, we live under different law, are owed different courts, have different offices, different elections, etc., etc., etc. **Our banks are different, too.**

Global Family Group (GFG) – Privately owned and operated Yes, GFG is privately owned and operated, but The Global Family International Trade Bank, a separate entity, is **publicly chartered** by the Federation to do business here according to the Charter and Bank Treaty.

1. Global Family Group Private Member Association – Privately owned and operated Our banks aren't part of that entity or operated according to the laws or policies of that entity.
2. Global Family International Trade Bank – The Federation Chartered it as a vendor and it operates in accordance with our Law The Federation did not charter The Global Family International Trade Bank as a **private vendor**. We chartered it as a **public vendor** subject to our international government and operated under our Public Law.

It is all about changing for the better, learning to recognize and analyze our good points gravitating towards a higher utility unifying in solidarity staying true and on course with our primary purpose. Principles before personalities. Understanding how they perpetuate your own, personal calling without perpetuating division based upon imaginary dependencies. There is nothing stopping anyone from taking the High Road and joining in The Blue Dot Bank System, simply by getting organized, taking the steps, agreeing to the terms and form of Law, and conforming their computer systems to be able to interact with the new overall international systems network. Everyone reading this needs to take note. The Federation is tired of misrepresentation of its actions and interference in its functions. We are leading the worldwide Exodus from the venal ugly banking systems of the past. Anyone who wants to have a whole new relationship with money and banking needs to join, not compete.

Discussion Topics

- What is it about us that is attracting the type of disunified behavior on mattermost? People are spreading disinformation on Mattermost. That is what is causing the problem. We have addressed several of those points here.
- Is Global able to perform the service required? If not now, when? Contingency? Global is doing exactly what it is supposed to be doing. It is **servicing as a bank incubator for the States and all the people worldwide** who desperately need relief and banking services. A “bank incubator” helps multiply and grow other

banks in a banking system, like a Mother Hen with chicks. It provides affordable access to secure, private satellite systems, it provides in this case, access to unique computer languages and interfaces, it provides help and guidance and resources to the other banks to get started and set up and run properly, it assists the Federation in setting the tone and popularizing the ideas behind the Prosperity System above and beyond any Banking System—and in that capacity helps educate and unify humanity around a common core of healthy universal values and observable truths about assets, money, credit, value, and investment. It's not “just” for Americans that we labor in the international arena. We aim for the freedom and good of mankind. We aren't short-changing anyone in America by doing so – far from it, but we are expanding the worldwide economy, making it possible for billions of people to live peaceful and abundant lives, and refocusing the resources of the planet on positive, life-affirming technologies and investments.

- Any questions?
- Verify SKRs for funds transferred into Global International Trade Bank. This has already been done, but not using SKRs. SKRs are part of THEIR system, not ours—which underlines the fact that all the “experts” second-guessing us don't know what we are doing or how we are doing it. Some members of TACT may be familiar with the current brand of banks operating in completely different jurisdictions and under different forms of law, but that gets no bananas here. It takes 2-3 years to re-educate Bar Attorneys and only a year to educate a complete greenhorn. It's the same for bankers. **Please also note that the Federation has oversight of the individual States in international jurisdiction, not the other way around, and the Federation which formed TACT can also dissolve TACT, if the group oversteps its role and purpose.**
- What can Coordinators and Assemblies do to bring a successful launch with action item list with tasks that need to get done. We are not the vendor and do not define or control how GITB develops the process to perform the required service agreement As stated, this system is **nothing like** any system that exists at the present time and we have accordingly planned for: (1) immediate access service to people in the interim while all these banks are being set up; (2) service to States as we deploy training teams to each State and systems support to each

State as each State Bank comes on line; (3) opening of State Bank Accounts with The American States and Nations Bank and ASAN Commercial Bank; (4) migration of all individual and business accounts to the correct country, State, and nearest State Bank location. These are all people banks – even the commercial functions are set up to serve Lawful Persons.

- This really should not be so hard to grasp. The land and soil is a separate jurisdiction. It is inhabited by people and Lawful Persons. It has different forms of money. It has different laws. It requires different banks, too. So far, all we've heard is a lot of false suppositions about how our banks operate or should operate and who should operate them and all of it is based on how banks in the sea and maritime jurisdictions operate. Get a clue. You don't know how these new banks operate any more than you knew how State Assemblies operated at the beginning of this effort. It's a learning process and both those people operating the State Banks and the people using the State Banks will have to learn a whole new world of banking. The first and most important goal, however, is to get relief to individual families, so that they don't starve and their communities don't suffer. We have provided a means for everyone who has returned to the land and soil to get an account at a land and soil bank, albeit, an incubator bank, so that we can begin distribution of prepaid credit.
- Establishing a collaboration team with a memorandum of understating. It is way late in the process to add variables and teach project and service launching methodologies and best practices. There is no need for individual States to do this and it would be a waste of time because (1) you don't have people who know the new banking system, so (2) the best you can do is identify people who want to learn the new system and who are willing to take the training and help set up the State Bank, and (3) stop all the drama. Every bit of this has been done for your good, to set you free from financial enslavement. There is no hidden agenda. It has all been published –literally published and made public.
- So a standdown (roundtable) with a detailed agenda clearly defining tasks that may be required to properly move forward. Nope. Not needed, not even possible at this point. Identify interested people, start thinking about currency exchange processes, start thinking about the vendors you usually do business with and

who you would like to accept your cards, start learning the advantages of your own system and once brochures are ready, be ready to explain the advantages to vendors and tell them how they can sign up.

- Review important patterns and decision points in the banking history that will allow a forensically reconstruction of where the process started to steer off course and how previous attempts to take corrective action might have failed. Again, this whole idea that our process or our bank got “off track” is based on **separate actions** taken by the Fab Five (Darla, Yvonne, Xavier, Anita, and Eddie) involving completely **separate entities** (a State of California Credit Union) in a **separate jurisdiction** – commercial maritime jurisdiction. **Not land. Not soil. Not our bank.**

How many times do I have to state and restate the obvious?

Whether The Fab Five were working as a team of instigators to try to undermine our work, or just some otherwise well-intentioned but profoundly confused people, all they did was create a lot of misunderstanding, drama, delays, misery, extra work, and blame.

When you see a situation where: (1) the truth is being misrepresented (what they were doing had nothing to do with our bank—they all knew they were working with a State of California Credit Union); (2) people have done something and then blamed others for it; (3) a lot of panic and drama and ill-will is generated; (4) the victims have to make up for it --- that’s evil.

You will know evil by its fruits. Period.

So that was evil, and so was what happened with the LRO v LRS nonsense. People on both imaginary “sides” bad-mouthing and undermining each other’s efforts for two solid years when they should have been collaborating and helping each other, the LRS finally giving up because of underhanded commercial attacks spawned by misled hackers from Washington and the Bay Area, all the

Assembly members who had their records on the LRS losing the use of their credential cards, the Federation having to eat the loss of the equipment and software and everything else that went into the LRS, and start all over again to rebuild an international recording service and provide remedy to the Assembly members who had been harmed ---- what an ugly, unconscionable, evil mentality went into that debacle, and what a pile of evil fruits, too.

Observe the pattern of evil: It starts with falsehoods. It continues with gossip and fear. It spreads like contagion. It harms everyone it touches. It leads to blaming. Those who are blamed are rarely the ones at fault, but they get stuck paying the bill and doing the extra work. At the end of the day, everyone concerned has been stressed and harmed in one way or another. There has been a loss of unity and joy and security; doubt and panic and misery of one kind or another has entered in for no good reason.

I have watched Evil take root and grow and bear fruit often enough to be able to identify it like a weed in my garden. Everyone here needs to get to that point of discernment and be able to identify Evil's earmarks with an unerring eye--- just like chickweed in a rose garden.

Our efforts, especially the Federation's efforts, have suffered two big blows in the past two years at the hands of Assembly members and Coordinators who got off track, so let me suggest that the problem TACT needs to consider is how do we stop the Corporatist Attitudes and Assumptions from creeping in? How do we teach people to recognize and eschew Evil, instead of falling victim to it again and again?

- Before we try to bring things back into shape, it is necessitated to run a cause-and-effect diagram and do a cost-benefit analysis. Identifying the root cause is the most important step. A problem well-identified and defined has a better chance of meeting its successful outcome. **As already stated, there's nothing "out of shape" except in someone's imagination. And doesn't this sound**

like a perfect example of the “Corporatist” attitude and the system that we are trying to replace??? “Cost benefit analysis”? “Cause and Effect Diagram”? The problem identified already is that people are thinking of our banking system as THEIR corporate banking system, and making assumptions and claims that are not true, based on ignorance, fear, and regrettably, misplaced self-interest. It has to stop or everything that we have struggled for will be wasted and we will be right back in the Rothschild Sweat Shop.

Preventing conflicts and progress

Lack of clearly defined and/or achievable milestones and objectives to measure progress **We’ve already made the progress that is necessary and are right on track.**

Poor communication – One source for distribution **Please note—that isn’t how we do things, that’s how THEY do things.**

Lack of communication by senior mentors ensuring accurate information is dispersed **Beginning with who? The Federation knows what it’s doing and is giving correct information, but someone doesn’t appear to be listening.**

Assembly resistance – direct or indirect **Any “resistance” will be caused by people being fed a bunch of horse hooey and not understanding how the new system works and how it benefits them and their State.**

Insufficient funding **We don’t have any problem with funding anymore. We have a problem with distribution and exchange rates.**

Processes and Checklists for people to know the account is accessible and functioning **The bank is Beta Testing to be sure that all accounts function and all cards function within the new system and with the vendors who sign up. That is not the job of any Coordinator, State, or Recorder.**

IMAGINE a worthwhile passion or goal.

Goals are simply **successful-outcomes** that you 1) Imagine 2) Plan and 3) Build.

Always start imagining with the-end-in mind. To do that, simply imagine successful-outcomes that assist American Nationals to:

- a) Feel Important
- b) Become more successful
- c) Be part of a winning team

It may not have occurred to some of you, but you are already part of a “Winning Team” (--- another Corporatist Slogan). At the current time some people are still having trouble grasping the structure and jobs of various parts of our traditional government, but we will get there. We are part of a “Winning Team” because we are all Americans, one of the winningest teams in world history, much to the Elitist’s dismay. Here we are, these worthless mongrels of every creed and color,

with our upstart government, which despite all the best tricks, gimmicks, lies, and all the money in the world, refuses to die and refuses to forget its identity. America and all our feisty fifty States still keep a-coming. We rise above. We tell the truth. We bring our claims. We take on Goliath.

At Fort McHenry they piled the American bodies forty feet deep and each new layer held the flag upright through the night, dead hand to dead hand. Think about that and tell me about being on a “Winning Team”? We are The Team of all humanity gathered together under the banner of freedom. We are together. And anyone who forgets that is in a delusion.

Determine time constraints

Nothing builds confidence more than **practicing** how to complete successful projects.

DISCOVER & MOVE project UNKNOWNNS to KNOWNS

- a) Discover your Unknown / Unknowns List
- b) Discover your Unknown / Knowns List
- c) Discover your Known / Knowns List

We just reiterated part of what you should already know.

And we just gave you some important new information – that is, you don’t know how land and soil banks operate. Period. So stand aside until we have time to teach you. Stop trying to misapply ideas you’ve picked up from your experiences with corporate banking. Stop trying to “politick” and divide and conquer and do “pie charts”--- that’s all their gig, too.

Stop making things up, trying to discredit Global Family Group and trying to make it look like there is some kind of “emergency” or competition. Stop spreading the ridiculous rumor that our banks are running under any authority borrowed from the Kingdom of Hawaii. Stop spreading rumors that Hunter, a former fighter pilot in the United States Air Force, is instead some Aussie character. Stop spreading rumors that Hunter “ran away” from the mess that Darla, Yvonne, Anita, Xavier, and Eddie dumped on his lap. Stop spreading rumors that Global Family Group is acting as a private vendor. Stop spreading rumors against the Federation, without which you wouldn’t even have a competent representative with standing to claim back your assets and your Good Names. Stop spreading the manure. Stop spreading the rumor that Hunter isn’t papered up as a man on the land and soil.

We don’t have time, money, or patience for power-mongering, politicking, lies, sole source despotism, divisiveness, confusion, disinformation, gridlock, fear, panic, deliberate promotion of false assumptions, and all the rest of the familiar fingerprints of Evil – even when it comes from good people, Evil is still Evil.

I am grieved at heart by all of the above, and yes, I have observed all of it right here among us.

Let me explain something to all of you.

Hunter flees Evil. He turns his back on it. He refuses to assist it. He doesn't have time to reform others and he realizes that they have to change themselves. They must change their own mindsets from being Corporatists to being People. He can't do it for them.

Certain people betrayed him, betrayed the Assembly Members who trusted them, and left Hunter with the additional job of cleaning up their mess and taking the blame for them and their actions --- when he already had more than enough to do.

All that is Evil. It's the fruits. It's the fear. It's the falsehood. It's the injustice to all concerned: Hunter suffers, Global Family suffers, the Assembly members suffer, the Federation has to struggle to rebuild, our efforts to get relief to the people are delayed ----and those who are actually responsible for it all, blame the victims.

That's Evil.

Hunter made a good faith effort to teach goodwill, harmony, and other ways of doing things, and what he got back in return was the same old Corporatist Garbage, full in the face.

No wonder he calls them Evil and refuses to have anything more to do with them. The only difference between him and I in this, is that I hold out the hope that they will get their heads screwed on and change their mindset. Change their assumptions. Change their way of operating.

Until they do, they are just Corporatists in State National clothing.

You will know them by their fruits.

STEPS 5 & 6 often happen at the same time.

Once you move enough unknowns to knowns – smart goals are often easy to accomplish

Don't be afraid to ask for help with Step 5 – Nobody knows everything, but somebody does!

SMART GOALS – Streamline a Project's Critical-Path regarding To-Do's
S.M.A.R.T Specific, Measureable, Attainable, Relevant, Time oriented.

Review the document: Smart Goals Template [[Click Here](#)]

We have had enough "SMART" everything; it's an acronym that has to do with Surveillance Technologies and patents that are criminal. We don't need to have that mirrored as something else, too. Whoever is promoting this, just stop. Before we worry about Artificial Intelligence, let's fix the problem of natural stupidity.

It's stupid to lie.

It's stupid to insinuate and misrepresent things, because all it does is make you look underhanded and further confuse things—which prevents problem solving. Unless you want to look like a sneaky thug and prevent people from identifying actual problems and solving them, this whole thought pattern needs to change.

It's stupid to believe that there are problems based on false information, and continuing to “work on them” after that false information has been corrected and debunked.

It's stupid to use Corporatist buzzwords and concepts and engage in Corporatist practices and use Corporatist assumptions when you claiming your birthright and standing on your own land and soil. Not only does this put us in the wrong lane-- puts us in the wrong mindset.

KPI(s): Key Performance indicators GUARANTEE successful-outcomes Whatever you measure – improves! This practice also creates anxiety and a competition-based mindset and shifts our attention to numbers instead of people; it's part of the Corporatist world, not ours.

Key performance indicators (KPIs) are where the rubber meets the road. **See the familiar Corporatist three-letter jargon and thinking behind this?**

They help us succeed in committees, smart goals, projects and to-do's - helping us know what to refine so we can be even more effective and successful. **Still more evidence that this is all Corporatist thinking and doing--- get down in your little treadmills and push that lever so you can get a kernel of corn, or a gold-star on your performance chart. This is their world, which someone is trying to recreate in our world. Perhaps they miss the familiarity of Hell and feel compelled to recreate it? Perhaps they know nothing different?**

Despite what Corporate America thinks, they are NOT people bashing performance reviews. **Corporatist America would know what to think – you are using their techniques, following their playbook, and you are going to reap what you sow. That's what Corporate America would think, and they'd be right.**

They simply tell us the following:

- a) Where we are
- b) What we need to continue doing
- c) What we need to alter or stop doing
- d) What we need to begin doing

What we need to do is stop this whole line of thinking and behaving and trying to set ourselves apart from the Corporatists while acting like and speaking like and thinking like Corporatists --- anyone with a brain reading this sees the deliberate attempt to confuse everyone concerned. You've spent three pages of promoting Corporatist practices and catch-phrases, and now you want us to assume that

you aren't Corporatists in Sheep's Clothing? Good try, but we aren't "suggestible".

For Example

Opportunity	Objective	Key Performance Indicator
Web site traffic	Increase 10% by third quarter	Track daily traffic % of visits
Fully paper-up people	New inquiries fully papered-up within 6 months	Track turnaround time for new Americans for each state
Dashboard	Show progress of each state – identify what elements to track	Conversion Rates Turnaround time 4 Pillars
4 Pillars Org Chart	Identify min requirements for each pillar	Collect info from progress rpts and add to dashboard
Vetting	Second set of eyes and coversheet with autograph of verifying official	Hard copies to: State Coord, County Organizer, Jural Assembly, Militia
[Right Click]	[Insert]	[Insert Rows above]

Draft Prepared by Harold Heinze
for presentation on February 17, 2023

OOOOH! “Matrix Management” ---- ???? Straight out of the Corporatist Handbook for Sheep Handlers 101 – first create the Matrix, then set Performance Criteria, then Whip the Slaves. How can anyone imagine that we have done all this, so that we can continue to live and work in a matrix? Or that we

have come together to “manage” – that is, act as the Overseer Thugs and Bean Counters -- on a new “plantation”? Stop this! This is all their thinking and doing. Not ours.

People Human resources with emphasis on experience
Need roster and experience spreadsheet

Oh, so we are supposed to treat ourselves and our equals as “Human Resources”? Not this Babe.

Learning Training requirements and instructor availability

As far as banking on the land and soil is concerned, there are only a handful of people who know what that is about and so teachers are few and far between and they are currently training teams to be able to come out to the Assemblies and train people in the Assemblies about the new system. They are coming to you from the Federation level because these people naturally work in international jurisdiction, not national jurisdiction. And that’s just the way it is.

Operations Staff and operational positions
Office locations and special equipment needs

Regulation Both sides of State & Federal compliance

We aren’t under the thumb of THEIR “State” and “Federal” compliance. They are under our demand for performance—you have this exactly backwards. Where are you getting these assumptions? Where is there any “grant” of power to any part of THEIR governmental services contract giving them the right to usurp power over our banking functions? No such grant exists.

Budget Plan, budget, tracking, and analysis

Assets Location, claim, retrieval, and monetization This is a Federation function occurring international jurisdiction.

Financing Services needed and/or provided Only with respect to what the State Banks think they need to get started and take over the migrated accounts. But bear in mind that because this system is so different, many of the assumptions you are likely to make will be wrong.

Accounting Carriage accounting as used by governments Correction--- carriage accounting as used by plain old people. No tricks. No padding. No “extras”. No “Special Fund Encumbrances”. No Bull.

Money Lawful, gold, silver, currencies, ASD coin & dollars Our system is competent to handle all species of lawful money and certificates as well as all forms of credit. Remember it’s bilateral, and they cannot stop us from dealing

with both sides of the system – because their currencies are underwritten by us, and those who own the assets also own the credit generated from the assets.

Audit Internal & external requirements, State & Federal None of that applies. They are accountable to us. We are not accountable to them.

Moving \$ Transfer systems, availability, restrictions, apps All in place. All unique. No Swift, no BRICS, no Microsoft, none of it.

Security Physical and electronic (data & talk) Already have our military grade encrypted satellite system and unique computer language capability.

Additionally, answering questions from people. What does the pre-paid and AFD roll out look like? How do open an account? What are the requirements? What is asset backed token? So we are going crypto currency and digital for an American Federation Dollar? We don't want to be tethered to a cell phone(prince of the air) or a Babylonian system. Will it be lawful or legal currency?

If anyone had been listening you would know, so just for grins, let's go over all of this AGAIN.

(1) It starts with pre-paid prosperity cards. No cash substitutes at first, just our own prosperity cards. Printed AFD “cash” bills will come later as the State Banks open. (2) You go to the Global Family International Trade Bank page and sign up. Because most of us are already recorded, we use the “Already Recorded” button. (3) The only requirement is that you have reclaimed your natural and lawful political standing as a man or woman standing on the land and soil jurisdiction. (4) All lawful money is asset-backed token money. A gold coin is a “token” standing for the value of other goods and services of the same value. (5) Just because transactions are kept on a computer ledger does not make the currency “crypto” or “digital”. Asset backed money has “substance” backing it. The AFD has physical gold backing it and when the bills are issued, they will have gold embedded in the paper. It is not blood money dependent on future performance of labor. (6) Nobody is “tethered” but if you want to use your prosperity card, you will have to use your own unique QR code to access your account until the cash bills are issued. (7) All money systems go back to the Babylonian system originally – which is why people need to stop and re-think what they are doing and what it means and how they can change things – to get away from all signs, symptoms, and forms of “money” because it is related to the practice of idolatry and needs to be transitioned out of our lives and our consciousness.

Unfortunately, that takes time and education and other means to conduct trade. If we were to force this change without proper preparation, billions of people would suffer and many millions would die. So here we are, doing the best we can to get moving in the right direction.

Procedures for Global International Trade Bank for accounts, checklist, publishing, credential card.

Those who have already recorded in either the LRO or LRS or who do so through the LRO in the future don't have to record anything again. They just have to provide enough information to verify that they declared, recorded, and published.

Update on beta testing of the pre-paid cards. On hold. The first Beta Test has been completed and a physical flaw in the initial cards has been identified and is being corrected. In the upcoming second Beta Test the bank will be including instructions, lists of participating Vendors, and Vendor Sign-Up materials will be released as soon as we are finished fine-tuning the physical defect found in the first-generation cards and finish the Vendor materials.

The second Beta Test may or may not provide a test basis for all fifty states, but should identify any other general problems with the cards, the computer system, the satellites, the Vendor interface, and the exchange conversion back and forth between AFD and FRN. It will not test exchanges and conversions in any other currencies yet.

After that and any corrections that are needed, the prosperity cards will be issued with a "Report Problems" hotline connected to service representatives trained to troubleshoot card and system malfunctions and to assist vendors.

By this time next year we expect that the advantages of this system will result in a tsunami effect as both users and Vendors appreciate its value and migrate into our system. Some of this will be for the right reasons, and some will be motivated by greed. Our job is to – as much as possible, educate people in advance, prepare to provide recording services to a flood of new people, and encourage people to think in terms of making investments in themselves and their families and their communities and environment.

We expect that with the right education, people will make common sense use of the money to build a better future. Although this is the first banking system in the world to embrace these concepts and we are the first government to open up land and soil jurisdiction banks to the General Public since the 1900s, earlier studies suggest that given good orientation and limits, people will use the funds to take care of their needs and improve their circumstance without "crazy spending".

In an earlier Swiss Beta Test, people first took care of delayed medical and dental needs, home and car maintenance and repairs, and then began branching out to lifestyle expenditures and education. Heart-warming engagement in community care projects was common, as were one working-parent families, increased participation in home schooling and integrated curriculum programs, more middle-aged people decided to change careers and go back to school of some kind, more comfortable and secure seniors did more community service and family service work than before. Businesses participating in the test benefited from the lack of taxation and regulation burdens that in some cases provided 25-55% relief from cost of running their business. Like individuals, businesses used

the money for their urgent needs first, like new business locations, expansions, integrating new tech and more hires, after that, spending veered toward increased advertising and customer and community service.

Our system is much simpler, so easier to run and cheaper to operate. Given a choice between our system and their system, it's a no-brainer. That is why they are so afraid of us. It hasn't yet occurred to them that they can reform their bad behavior and profit from doing so.

Most questions and commits seem negative on the surface but exposes the underlying fear. FOMO (Fear Of Missing Out). Yes, many unknowns exist. Many are excited and have a plethora of special interests and visions of a better future. Opportunity to capture this valuable data (ensuring people are understood and valued). Have fun, be true to thyself. This is life and not a dress rehearsal.

Moving forward: A strategy for all states. We are the modern-day founders. Staying on course towards our primary purpose. Set the example for people and provide tools for how a lawful government is populated and driven.

Note to Assembly:

Please review Banking and Pre=Paid Information - ****Caution**** I have not received verification that Anna has authorized the publishing and full support of this paper...Sending out with caution in case you receive it from some other source. I will get verification and validation. I do not like sending info without proper vetting, but this is beginning to be circulated. [Great Awakening_FRN Safety Vault 6102023.pdf](#)

It is estimated that the actual value of an FRN is 1/180th of a dollar as a result of counterfeiting and inflation. If that is used as the value in a revaluation, everyone who is NOT standing on the land and soil will be bankrupt and in debt, instead of being wealthy and free.

A process known as "safe havening" can take long term assets like IRAs and 401Ks and lock in their trade value. I am told that this was the objective of the Credit Union mess, but they jumped the gun and mistook the jurisdiction. Now that the AFN is denominated, it's possible to set up so-called Safety Vault Accounts, but everyone doing so needs to realize that this is not a normal savings account. Like an IRA or 401K, it's meant to go into a deposit and stay deposited for a long time.

In emergencies, like an IRA or 401K, you can access it and all you lose is the interest, which is much better than a conventional IRA/401K that carries stiff fines for early withdrawal, it's secure from bank seizures and bail-ins, if things go South via a Revaluation of the FRN, it retains its value and stands to exponentially increase in value. If you don't understand the benefits and the downsides of such an account, choose more conventional savings accounts.

It's good that this was brought up as it allows a discussion of the hour-by-hour gee-hawing that is going on in the world banking system. The fact is that nobody knows for sure yet what to expect. We are doing good to hold onto our own assets and credit and prepare our own in-our-lane, secure, and separate banking system.

For example, all the currency speculators have been told for years that they should expect to have to go to military bases and sign Non-Disclosure Agreements in order to exchange their foreign currencies like Zim and Dinar --- now, we are being told that people will be able to go to any bank that is equipped to do exchanges and make exchanges without any such cloak-and-dagger overtones. And without any scalping by the military middlemen.

All they will need, we are told, is the currency they wish to exchange and a bank account to credit the exchange, or a safe means to transport the receipts in coin or cash. We are not in control of these preparations as they are occurring in the jurisdiction of the sea under the direction of the British Territorial Government. Who knows what to expect?

The most recent information I have about the currency revaluation is that the International Banks have called foul on the military's plans to retain percentages of exchange values and "offer" (under color of law) a small percentage of the actual exchange value and charge off the rest as an undisclosed service fee. That is, a Zim worth \$1T will be exchanged at \$1T. It won't be exchanged for \$3B and call it good, with the middlemen reaping the difference between \$1T and \$3B as a Service Fee.

The Global Family Trade Bank accounts are equipped to receive gold or silver asset backed currency deposits, while The Global Family Commercial Bank is able to receive FRNs and other debt-credit currencies. This is what makes a bilateral banking system so desirable. Assets valued in AFD in the Trade Bank can be sold, traded, saved, or be translated into debt-credit notes at will.

Without the steps we have taken, we'd have no playing pieces on the board, no way to pay actual bills, no way to receive payment on an international basis.

Our opponents would like nothing better than for us to fight among ourselves and be scared and faithless; they've been using "divide and conquer" for 2500 years and they are experts at it. Right now, they are trying to create a division by identifying our nation-states of the Union as "states" and our States of the Federation as "States".

This style convention is brought to us by the City of Rome and derives from Latin. In Latin, they use all small letters to denote the Patricians and Upper-Lower Case to denote the Indentured Servants. So the Union States in Latin are "states" and the Federation States in Latin are "States" but in English, our official language, as we already explained ----both are simply States, and what is even more important, all these States belong to the same people --- us. All of us.

If they can, these Undeclared Foreign Agents, will weasel around and try to find any crack in our unity and use that to break what we have accomplished or commandeer what we have worked for, for their benefit instead. The stakes are huge --- nothing less than this entire continent and the future of everyone living here.

We have explained how they work, so look for their Modus Operandi. Look for the “fruits” of Evil. Look for lies and misrepresentations and deceit. Look for gossip and “casting” --- as in “spellcasting”--- doubt, confusion, and uncertainty. Look for in-fighting, power-mongering, control junkie behavior, Corporatist practices and buzzwords, despotism, doublespeak, impersonation, authoritarian and hierarchical practices and structures, elitism, blaming, tattle-tailing, finger-pointing, drumming up “urgency” and emergencies that don’t exist, use of insinuations, politicking, divisiveness, groundless accusations, Corporatist mindsets, faithlessness, double-dealing, coercion, name-calling and labeling, cliques and secret committees, attention seeking, duplicity, and greed.

Everyone needs to understand that this is a very fluid and ever-changing situation with many different moving parts and pieces. Things could change any moment and result in entirely new scenarios. The revaluation of the world’s currencies might never happen, but we must plan for that eventuality and try to protect our people just the same. The High Courts could liquidate the offending corporations and put an end to the snake pit environment we have all been living in. The Military, faced with its disgrace, might rise above it. Any of these factors and many more can radically change the economy and the banking systems worldwide without notice.

Rumors are also circulating – widely – that the central banks are planning a False Flag collapse of the stock markets, which would almost certainly be an attack on the main stock exchange hub in Tel Aviv. Such a collapse is all but inevitable because the central banks have engaged in illegal and unlawful commodity rigging schemes for so long that nobody knows what the free market value of anything is anymore. To continue a stock market or even an international market exchange requires us to establish free market baseline prices. All this can drastically alter everything, too.

Please remember this and do your best to deal with this complexity and uncertainty with honesty when discussing all this among yourselves and with members of the Assemblies. We can’t control the actions of others, and that scales up to the fact that we can’t control the actions of other nations. The best that we can hope for is to govern ourselves honorably and work productively for a better world.
