

Special Urgent Message to the Rest of the World

By Anna Von Reitz

In responding to the flood of "concerns" being voiced by Americans, and especially by Americans who have taken our advice and left Babylon months if not years ago, I forgot momentarily about everyone else. Please forgive me.

Here is the rest of the story concerning the Brits and Aussies, Indians and Africans and everyone else.

You are probably not fully aware yet, but "the US" -- a foreign Municipal corporation ultimately operated by the Roman Pontiff, used our country as a pirate base. The form of piracy they were engaged in is commercial piracy. It all took place on paper and was processed through the courts, using "legalities" instead of Public Law.

They used our delegated powers and usurped upon them and abused our United States Patent and Trademark Office (USPTO) to this end.

Just as they "converted" our Given Names first into Territorial (Commonwealth) trust property, and then converted those trusts into Municipal corporations, they did the same thing with whole countries.

That is, Australia -- for example, was converted into Australia, Inc., and Australia, Inc., was then converted into AUSTRALIA--- a Municipal corporation operated by the Roman Pontiff and Company, purportedly while acting "for" us, so that we, the Americans, would be blamed for what both "the US" and the Brits (SERCO) actually did while operating in Breach of Trust "in our names".

While this plot is so wide-reaching and diabolical as to stagger one's imagination, there is one silver lining. It was all based on fraud and piracy and all exists only on paper ---paper that was being employed by criminals to bring false claims in commerce and to enforce unconscionable contracts.

Another silver lining is this: we -- the actual Americans -- took action as described in our previous post to protect our country and our countrymen and to rear-end this whole plot. And we similarly protected all of you as we were passing through.

You see, because the Plotters used our country and our USPTO as their pirate base, all these "legal actions" were undertaken here and placed "in our names" so that these brigands could safely operate and then blame us if something went wrong. That means that all this "stuff"

they created was in their control, but created "in our names" via our misdirected and purloined international service offices.

So we did the same thing for you all that we did for ourselves.

We accepted their "gifts" of "AUSTRALIA" and "JAPAN" and so on, and returned them to "Australia, Inc." and "Japan, Inc." then, claimed the Territorial corporations and rolled them back into the National Trusts they created, and thence to the Australia Trust and Japan Trust, and then all the way back to Australia and Japan, et alia, returning everything and everyone to Original Jurisdiction at the Nation-State level.

They made it all technically "our" property and hid behind our country as a smoke screen and storefront, so we just made use of this circumstance to claim ownership (temporarily) and then knock it all back to you and distribute the assets and the profits back to the people those assets belong to --- the same way we have done it for our own country, only in the capacity of foreign "owners" distributing their "property".

Read that: you're covered.

The International Trustees acted in Gross Breach of Trust. The Roman Pontiff and British Hegemony acted disgracefully while we were all lulled to sleep by their platitudes and Bon Homme act.

They tried to start World War III based on nothing more than fraud, Breach of Trust, lies, and unconscionable contracts to be enforced by minions employed by their very own incorporated franchises.

And that's the truth of the matter.

I won't give the "All's Well" and "You can go home now" part of the speech, because that's not the case. All is not well and no, you can't quite go home now. You have to organize yourselves as we have organized ourselves.

You have to delve deep into the legalities and traditions and nomenclature peculiar to each one of your countries, and do your individual declarations and recordings of property interests. You have to restore and discipline your own courts--- and those who have been operating your governments.

But the False Claims of the Roman Pontiff have been overturned, and the pirates have been caught red-handed. Your assets are safe and have in fact already been returned to you and lawfully converted back to Original Jurisdiction. You just have a lot of housecleaning and homework to do.

So don't think that "Anna von Reitz left us on our own." It's just that we had to unravel the Mess here before we could see how they'd involved the rest of the world in their mad endeavor--- using us as the Bad Boys and scapegoats the whole while--- and then also a matter of not knowing all of your laws and languages and nomenclatures and names and dates, and finally, not immediately having the means to record and process all this.

We re-flagged things back to the level of your country standing in Original Jurisdiction, but from there on, we either need your help sorting through the details, or you need to take it the rest of the way "home" by yourselves.

Most of all at this critical moment, you need to breathe deep, stay calm, and keep the peace. Make sure your politicians have no excuse to start a war or invoke any action against you and

yours. There are a great many criminals who need to be arrested and that will cause some disruption, but don't add to it by losing your nerve.

The game has already been won. Justice will be served.
