

To Our British, Aussie, and Canadian Friends

By Anna Von Reitz

Be assured that the Birth Certificate Fraud was started in America by the British-backed Territorial United States and implemented by the British Crown with the full knowledge and approval of Queen Victoria and her Prime Minister, Benjamin Disraeli.

We have all been victims and we have all been victims together. The proof of the matter stands in the British public and private records of the time. We were not the perpetrators. We were the first victims.

The object of dragging the old Babylonian Slave System out of the moth-balls was to finance the Raj in India and to promote the profitability of British agricultural investments in Africa and India.

It goaded the members of Parliament that their textile industry was so largely dependent on American cotton, which despite the cost of shipping it all the way from America, was still less expensive than the Egyptian cotton the British government subsidized and invested in.

So there you have the reason that our country was subjected to a bitter and illegal commercial mercenary war, aka, "American Civil War" promoted by Bar Members acting as Esquires of the British Queen and her cohorts in Westminster. This was also the means and excuse by which the British Queen and the Lords of the Admiralty usurped our lawful government in Gross Breach of Trust.

They simply substituted their British Territorial "States of States" for our Federal States of States using similar names deceptions to fool the trusting people of this country, and thus, commandeered our lawful government.

Four fingers are pointing back at Britain for all of this. Not at the British people. At the Queen and the Crown. And the Popes who, as Roman Pontiffs, assisted in all this criminality.

Since at least 1860, when Abraham Lincoln, a British Bar Attorney who was ineligible for public office in our actual government, took over as "President" of the incorporated British Territorial Government, all the bad things that the "Americans" and "the US" have been accused of are actually the fault of the British Government and the British Crown, instead.

They were using us as proxies, puppets, to do their bidding, carry their water, and pay their bills. And now, thank God, they are exposed as the criminals they are and that part of history is finally becoming history.

We have been ruthlessly, shamelessly defrauded and enslaved by our own purported International Trustees --- and those same Trustees have then dishonored every other constitution and treaty in the western world in the same way. After they pulled their sleight of hand with us, they betrayed their own people on their home islands and went on to rape and pillage Canada, Australia, New Zealand, South Africa, and every other member of the Commonwealth.

From there, they used our wealth and manpower to enslave the Indian Subcontinent, used our resources and manpower to promote the First World War and the Second. They cast the seeds of "perpetual war" in the Middle East in order to guarantee their oilfield investments.

This is not in doubt. They bragged about it. They wrote it down.

They think they are so very special that they will never be caught and brought to task for what they have done to the rest of the world.

You only help your own slave masters by mischaracterizing all this as an American problem or as the fault of "the US" --- when "the US" has been run as a proxy of the British Government for 150 years.

More than any other people on the face of the Earth the members of the former British Colonies need to wake up and join forces with their brethren still on the Home Islands to put an end to this Great Fraud ----- and we will say, Great Evil.

Without us and our manpower and our resources, Britain is nothing but a pile of rocks in the Atlantic sea, populated by an enslaved and down-trodden people who are laboring under six layers of taxation, invaded by foreign work forces, and helplessly trying to pin the blame for all this on someone or something other than their very own beloved Queen and Parliament and Lords of the Admiralty.

We have spent forty years researching these issues and we can tell you with great certainty and more than adequate documentation that the problem began in Britain and it needs to end there, too.

We suggest that everyone begins by realizing that the Disraeli-Gladstone Debates were about more than giving working people a vote and that the attorneys among us have a quite different meaning attached to the word, "enfranchisement".

We are not angry with the British people. We have suffered the same scourge. Our statement of the facts is not to blame the British people for the sins of their government, but to draw the world's attention to the facts, so that the facts may be dealt with.

It's an Old Chestnut that to solve a problem one must first realize that a problem exists, but it is well-worth restating here.

Britain, not America, is accountable for the sins of "the US".

Britain, not America, imposed the Birth Certificate Fraud on all of us, in Breach of Trust and via legal chicanery implemented by the British Crown.

What we do from here on, is what counts. We suggest that the people of Britain realize just how miserable they are and for how long they have suffered, and join with the rest of us to demand reform of their government.
