

Translation Key For Everyone

By Anna Von Reitz

The United States is the Proper Name of our Union of republican states.

Capital T on The.

But "the" United States is the Municipal United States, an independent international city state, a franchise of the Holy Roman Empire on our shores. This entity is a plenary oligarchy run by the crooked members of Congress.

The United States of America is the Proper Name of our Federation of States. It is an unincorporated business organization of which our States are members.

Notice again--Capital T on The.

But "the" United States of America is the name of a British Territorial Government that is responsible for the mutual defense of our States.

Remember these distinctions so that when you are reading news and other documents you can recognize which entity is actually being referenced---and be less confused.
