

The Two Minutes That Can Save Millions of Lives

By Anna Von Reitz

If you do nothing else today, listen to the first link provided below. And share it.

If you are like me, you have probably had one or more heated exchanges with elderly relatives who are scared out of their minds because they are in a "high risk group" and lining up already to get the new vaccine that is touted as the cure to Covid 19.

You've probably also been told that you are no expert, because you aren't a virologist. Well, here's one of the top virologists in the country laying it out for the dumbfounded.

Take two minutes out of your life to listen to this very short, very informative video. It can save your life or the life of someone you love.

<https://www.youtube.com/watch?v=tKsXVilB1Dk>

Then, there is Robert F. Kennedy Jr.'s Supreme Court Case, proving that vaccines have no quality control and haven't been tested for safety for 32 years:

https://cairnsnews.org/2018/11/19/u-s-govt-loses-landmark-vaccine-lawsuit/?fbclid=IwAR35rTdBhGW0u4j9T-ZWRv20-to7a4tiaUNgeb1F3AL9UGY7O3kzCzK_Fxw

If they still can't believe the facts, ask them to read this brief summary from Swiss Policy Research, founded in 2016, as a non-partisan, non-profit, independent fact-checking organization. You can find the long version with all the citations at their website--- but by all means, read this Overview first:

1. According to data from the best-studied countries and regions, the lethality of Covid19 is on average [about 0.2%](#), which is in the range of a severe [influenza](#) (flu) and about twenty times lower than originally [assumed](#) by the WHO.
2. Even in the global "hotspots", the risk of death for the general population of school and working age is typically in the range of [a daily car ride to work](#). The risk was initially overestimated because many people with only mild or no symptoms were not taken into account.
3. Up to 80% of all test-positive persons [remain symptom-free](#). Even among 70-79 year olds, [about 60%](#) remain symptom-free. Over 97% of all persons develop [mild symptoms](#) at most.

4. Up to 60% of all persons may already have a certain cellular **background immunity** to Covid19 due to contact with previous coronaviruses (i.e. common cold viruses).
5. The median or average age of the deceased in most countries (including **Italy**) is over 80 years and **only about 1%** of the deceased had no serious preconditions. The age and risk profile of deaths thus essentially corresponds to **normal mortality**.
6. In many countries, up to two thirds of all extra deaths occurred **in nursing homes**, which do not benefit from a general lockdown. Moreover, in many cases it is **not clear** whether these people really died from Covid19 or from **extreme stress**, fear and loneliness.
7. Up to 50% of all additional deaths may have been caused **not by Covid19**, but by the effects of the **lockdown, panic and fear**. For example, the treatment of heart attacks and strokes **decreased** by up to 60% because many patients no longer dared to go to hospital.
8. Even in so-called "Covid19 deaths" it is often **not clear** whether they died from or with coronavirus (i.e. from underlying diseases) or if they were counted as **"presumed cases"** and not tested at all. However, official figures usually **do not reflect** this distinction.
9. Many media reports of young and healthy people dying from Covid19 turned out to be false: many of these young people either **did not die** from Covid19, they had already been **seriously ill** (e.g. from undiagnosed leukaemia), or they were in fact **109 instead of 9** years old. The claimed increase in Kawasaki disease in children also turned out **to be false**.
10. The normal overall mortality per day is about **8000 people** in the US, about 2600 in Germany and about 1800 in Italy. Influenza mortality per season is **up to 80,000** in the US and **up to 25,000** in Germany and Italy. In several countries Covid19 deaths **remained below** strong flu seasons.
11. Regional increases in mortality can occur if there is a **collapse in the care of the elderly and sick** as a result of infection or panic, or if there are additional risk factors such as **severe air pollution**. Special regulations for **dealing with the deceased** sometimes led to additional bottlenecks in funeral or cremation services.
12. In countries such as Italy and Spain, and to some extent the UK and the US, hospital overloads due to strong flu waves **are not unusual**. In addition, up to 15% of doctors and health workers were **put into quarantine**, even if they developed no symptoms.
13. The often shown exponential curves of "corona cases" are **misleading**, as the number of tests also increased exponentially. In most countries, the ratio of positive tests to tests overall (i.e. the positive rate) remained **constant at 5% to 25%** or increased only slightly. In many countries, the peak of the spread was already reached well **before the lockdown**.
14. Countries without curfews and contact bans, such as **Japan, South Korea or Sweden**, have **not experienced** a more negative course of events than other countries. Sweden was even **praised** by the WHO and now benefits from higher immunity compared to lockdown countries.
15. The fear of a shortage of ventilators was **unjustified**. According to lung specialists, the invasive ventilation (intubation) of Covid19 patients, which is partly done **out of fear** of spreading the virus, is in fact often **counterproductive** and damaging to the lungs.
16. Contrary to original assumptions, various studies **have shown** that there is **no evidence** of the virus spreading through aerosols (i.e. tiny particles floating in the air) or through smear infections (e.g. on door handles or smartphones). The main modes of transmission are direct contact and droplets produced when coughing or sneezing.
17. There is also **no scientific evidence** for the effectiveness of face masks in healthy or asymptomatic individuals. On the contrary, experts warn that such masks interfere with normal breathing and may become **"germ carriers"**. Leading doctors called them a "media hype" and **"ridiculous"**.
18. Many clinics in Europe and the US remained **strongly underutilized** or almost empty during the Covid19 peak and in some cases had to **send staff home**. Numerous operations and therapies were **cancelled**, including some organ transplants and cancer screenings.
19. Several media were caught **trying to dramatize** the situation in hospitals, sometimes even with manipulative images and videos. In general, the **unprofessional reporting** of many media maximized fear and panic in the population.
20. The virus test kits used internationally are **prone to errors** and can produce false positive and false negative results. Moreover, the official virus test was **not clinically validated** due to time pressure and may sometimes react positive to other coronaviruses.

21. Numerous [internationally renowned experts](#) in the fields of virology, immunology and epidemiology consider the measures taken to be [counterproductive](#) and recommend rapid [natural immunisation](#) of the general population and protection of risk groups. The risks for children are [virtually zero](#) and closing schools was never medically warranted.
22. Several medical experts described vaccines against coronaviruses as [unnecessary](#) or even [dangerous](#). Indeed, the vaccine against the [so-called swine flu](#) of 2009, for example, led to sometimes [severe neurological damage](#) and lawsuits in the millions.
23. The number of people suffering from unemployment, [psychological problems](#) and domestic violence as a result of the measures has [skyrocketed worldwide](#). Several experts believe that the measures [may claim more lives](#) than the virus itself. According to the UN [millions of people](#) around the world may fall into absolute poverty and famine.
24. NSA whistleblower Edward Snowden warned that the “corona crisis” will be used for the [massive and permanent expansion](#) of global surveillance. The renowned virologist Pablo Goldschmidt [spoke of a “global media terror”](#) and “totalitarian measures”. Leading British virologist professor John Oxford [spoke of a “media epidemic”](#).
25. More than 500 scientists [have warned against](#) an “unprecedented surveillance of society” through problematic apps for “contact tracing”. In some countries, such “contact tracing” is already carried out directly [by the secret service](#). In several parts of the world, the population is already being [monitored by drones](#) and facing serious police overreach.
26. A 2019 WHO study on public health measures against pandemic influenza found that from a medical perspective, “contact tracing” is [“not recommended in any circumstances”](#).

And finally, here is the One Shot Mask Killer Argument that all State of State Governors need to get in their inbox ---- mandatory masks, contact tracing, invasive snooping of any kind ----- is against Federal Law:

The American Disabilities Act and HIPAA both protect people's health privacy.

Don't "volunteer" to give away your health privacy, because that can lead to the legal presumption that you have Covid-19 and that you are a Municipal US citizen ---- a PERSON that can be arrested and indefinitely detained.

I pasted this into my photo program and printed them nine to a page, cut these wallet-sized cards out and began distributing them to local businesses that had gone beyond the pale. In almost no time at all, those same businesses dropped the Mask Mantra and got back in line.

If you want my opinion, Covid-19 is a "Stupid Test" ---- to see just how far the corporations can go in creating BS and also how far the Public will obey them.
