

International Public Notice: Concerning "US NOTES"

By Anna Von Reitz

The same old guilty parties are trying two different end runs -- the WEF's "Great Taking" -- they are in for an unpleasant surprise; and, second, the British Territorial attempt to use our gold to back their promissory NOTES.

All this nonsense has to stop.

The actual lawful governments have stepped forward and reclaimed all their assets and have returned those assets to the people they belong to. There is no room, reason, or excuse for a bunch of idiot commercial corporations thinking that they are going to get together and "take" anything at all.

Least of all the natural resources that belong to the people of this country and our sovereign States of the Union.

Twitch. See what these morons get.

We have issued our Third and Final Foreclosure Notice subsuming all Corporations that have been formed under conditions of fraud and deceit, which includes foreclosure on our cured commercial, agricultural, and common law liens in all three jurisdictions back to 1702.

The banks attempting to issue US NOTES to replace the Federal Reserve Notes need to be stopped and apprehended; in their haste to issue themselves new credit to spend, the Perps forgot to ask the actual owners for permission to access our gold as a basis for their credit distributions.

We will incorporate these objections into our standing Express Trust governing these matters. We are exercising our exemptions and declining the offer to provide additional assets or extend additional credit to these service corporations until such time as they come to heel and secure a trustworthy American Paymaster.

The corporations, including but not limited to the incorporated Maritime Commercial Banks that will otherwise fail, need to take immediate action to lawfully convert their operations and make ready to engage in bilateral banking. Or close their doors.
